---

**BI-V-PINS DOUBLE DOWEL PIN w/ PLASTIC SLEEVES - RENFERT**

**BI-V-PIN WITH PLASTIC SLEEVE - RENFERT**

Narrow model pin with two dowel pins, ideal for positioning in limited space.

**Description**

- V-shaped profile suitable for use with close standing dies such as lower anteriors.
- Only one drilling needed for each die.
- Tapered shape glides easily into final position.
- Open-ended sleeve prevents clogging and simplifies cleaning.
- Reproducible positioning without vertical adjustment of bite.
- Small base thanks to reduced pin length (12.5 mm).

**Package:** 100 or 1000pk

US Dental Depot is an Authorized RENFERT Dealer in US.

**MAINSTAY DOWEL PIN SYSTEM - WHIPMIX**

The MainStay Dowel Pin System is a uniquely designed system for fabricating crown and bridge working models with sectioned, removable dies. The protective sleeve and tapered pin’s unique rectangular shape prevents the rotation of sectioned dies utilizing a single pin application.

For the other side, the Mainstay II dowel pin system is designed for labs that want the added stability of a dual pin while maintaining an easy to use pinning system. The Mainstay II pins are designed for use in crown and bridge working models with sectioned removable dies. Like the original Mainstay, MainStay II utilizes a protective sleeve and rubber end caps. Its protective sleeve and tapered, dual pin design prevents reverse placement of sectioned dies. In addition the protective sleeve grips the dowel pin creating positive indexing while protecting the base stone material from abrasion, once abraded the base stone can alter the fit of the die causing costly rework.
Finally, the rubber end cap stabilizes quadrants or full arch models and eliminates the use of a dowel pin bur. The Mainstay Drill Bit can be used for drilling holes for either Mainstay II or the original MainStay single pins.

- Asymmetric, dual pin design eliminates reverse placement of dies
- Ribbed plastic sleeve holds tight while pin removes easily.
- Rubber end cap stabilizes case while pouring base stone
- Metal to stone contact at bottom of pin for added stability

And finally, MainStay glue is specifically formulated for the dental laboratory. It offers an advanced cyanoacrylate adhesive that exhibits versatility, reliability, precision and extended shelf life. It instantly bonds plaster, metal, acrylic or porcelain.
