ALL PURPOSE DUPLICATION MATERIAL - BEGO

This All-Purpose Duplicating Material can be used with all stone and investment models also for pour acrylic dentures.

Features:

* A quality, reversible duplicating material for use with all investment types
* Ideal for use with all duplicating conditioners
* All-Purpose
* No wash required

## Duplicating Material Condition

### Nobilium-NOB-1010 Colloid Conditioner 2lb

**US$ 20.35**

Nobilium - Nobilwash Colloid Conditioner  
**Conditioners**  
# N-1010 - Mfg # 1010  

**Feature:**  
Colloid conditioner, used to wash Nobilflex for use with stone models.  

**Size:** 1 Quart (946 CC)

## Duplicating Material

### Silicone 4 duplicating
**DUPLICATION SILICONE - NOBILIUM**

**NOBILIUM - SILICONE DUPLICATING MATERIAL CATALYST**

**Description**
Free-flowing duplicating silicone. Requires both catalyst and base. Captures detail and is tear-resistant. Available in 1KG and 1 KG sizes.

**Technical Data**
- Shore A hardness (after 30 minutes): 18 - 20
- Shore A hardness (after 60 minutes): approx. 21

**DUPLICATION SILICONE ELITE - ZHERMACK**

**ZHERMACK - DUPLICATION SILICONE ELITE**

A-Silicone for laboratory model duplication. Ideal for duplicating stumps using the all ceramic technique and models with accentuated undercuts and investments. Use of a plastic duplication flask is recommended.

**Advantages**
- Rapidity: a duplicate can be obtained in just 10 minutes (23)
- Mixing facilitated by the 1:1 base to catalyst ratio
- High fluidity
- Absolute precision for faithful reproduction of detail
- Dimensional stability over time and non-deformability, allowing a number of duplications to be made
- Compatible with all plasters, polyurethane resins, phosphate investments and acrylic resins

**DUPLICATION SILICONE REDU-IT - ASD**

Premium model duplicating silicone. Great dimensional stability & accuracy. Won't shrink on standing. Unlimited duplication can be made from master model at any time. Easy release from any model material.
DUPLICATION SILICONE WIROSIL - BEGO

BEGO - DUPLICATION SILICONE WIROSIL

Descriptions:
* Wirosil is an addition-cured, two component silicone that reproduces exceptionally accurate master models due to its high dimensional stability.
* With economy flasks and stabilization insert.
* Wirosil ensures easy, reliable duplicating using the minimal amount of material.
* Ideal for duplicating milled surfaces in fixed/removable work.

ZHERMACK - 118538 Elite Glass Standard Pack (2x)

ZHERMACK - Elite Glass Standard Pack (2x 50 ml) - Z#C401610

Medium bodied CLEAR Addition silicone. Used for making a clear matrix, which can be light-cured through when preparing veneers.

USE

Creation of clear molds directly in the mouth of the patient for the subsequent application and polymerization of light-curing materials.

Can be used in a variety of clinical situations that require enamel shaping work for cosmetic treatments: pigmentation, closing diastemas, correction of dental rotations, crown fractures, morphological dental anomalies, creation of temporary crowns, etc.

CHARACTERISTICS

Clear, allows the polymerisation of light-curing and self-curing composites
Thixotropic
Hard after setting (70 Shore A)
Accurate
Dimensionally stable over time and to disinfection
Easy to reposition in the mouth after setting
It can be finished after setting with a cutting blade or bur

ADVANTAGES

Mixing The new formulation of elite glass has been designed to create completely transparent moulds, allowing a variety of cosmetic dental problems to be resolved quickly with excellent aesthetic results.
The use of elite glass significantly reduces the non-polymerised surface layer of the composites due to the inhibition by oxygen.

TECHNICAL DATA

- Colour: Clear
- Mixing ratio Base:Catalyst - 1:1
- Working time (23°C/73°F) - 0:40 min
- Setting time (35°C/95°F) - 2:10 min
- Reproduction of details - 20 μm
- Dimensional stability (after 24 h) - ( - 0.18 %)
- Hardness (Shore A) - 70

PLATINIUM 95 & 85 - ZHERMACK

High precision laboratory A-Silicone putty material

Use:
- Duplication of denture moulds
- Ceramics technique printed on verticulator
- Die in full dentures
- Control matrix for the design of metal structures
- Denture repair
- Bite recording key for positioning in articulator
- Matrix for use in making temporary crowns/bridges
- Matrix support for the working of metal free aesthetic materials
- Insulation of teeth/plaster in flask

ZHERMACK - 118524 Platinum 75 CAD - Standard Pac

ZHERMACK - Platinum 75 CAD Platinum 75 CAD 800g (475ml) Base + 800g (475ml) Catalyst

- Silicone 4 Duplicating
- # 118524 - Mfg # C400741

Use:
- Scannable bite regulation keys
- All types of mask requiring maximum precision and reproducibility of detail

Characteristics:
- Light blue color
- 75 Shore-A hardness
- Fast Set: 4 min
- Mixing ratio 1:1
- Biocompatible

Advantages:

US$ 112.32
**Duplicating Material**

**Silicone 4 duplicating**

- Light clinical blue colour to easily identify possibility impurities
- Formula perfectly scannable with CAD/CAM systems with optical, laser and tactile readings, without the need for reflective sprays
- Optimum consistency and surface to make high precision masks
- Quicker working times (fast set, 4 min) to improve efficiency in laboratory applications
- A 75 Shore-A hardness offers numerous uses and to facilitate finishing with a knife or bur

**Technical Data:**
- Mixing time - 0:30 min
- Working time (23C/73F) - 1:00 min
- Setting time (23C/73F) - 7:00 min
- Removal time - 4:00 min
- Hardness (Shore A after 24 h) - 75
- Reproduction of details - 20 ?m
- Linear dimensional variation after 24h - (± 0.05 %)
- Compressive strength - < 1 %
- Elastic recovery - > 99.5 %
- Heat resistance - > 200°C

---

**TITANIUM ECO PACK - ZHERMACK**

**TITANIUM - ZHERMACK**

**Extra-Rigid Setting C-Silicone Laboratory Putty**

**Use:**
- Duplication of denture moulds
- Control mask for the design of metal structures
- Impressions for copy denture technique
- Matrix for use in making temporary crowns/bridges
- Matrix for the reproduction of gingival tissue (e.g., Zhermacks gingifast)
- Insulation of teeth/gypsum in muffle

**Characteristics:**
- To be mixed with gel or liquid catalyst
- Final hardness (95 Shore A)
- White colour

**Advantages:**
- Very high initial flowability
- Good final hardness
- High detail reproduction
- No deformation in flask. Good breaking
- Heat resistance 180°C
- High elastic resistance
