**PROLINE - 016-022 Composite Repair Bonding 10ml**

PROLINE - Composite Repair Bond Enhancer 10ml

Repair
# 016-022 - Mfg # 016-022

Features:
Can be used on any plastic or polycarbonate surface for stronger bonds, especially useful on orthodontic brackets. May also be used to condition old composites to be bonded or repaired with a new composite. Compatible with chemical or light cure composites.

Quantity: 1

**PULPDENT - 039-SPL-C SplintMat Nylon Mesh Grid 5.5mm**

PULPDENT - SplintMat: NYLON Mesh Grid - Roll, 5.5 mm X 1 meter (39 long) # SPL-C

Reinforcement Fiber Strips Mylar Carbon Strengthener Maryland

SplintMat: NYLON Mesh Grid - Roll, 5.5 mm wide X 1 meter (39 long)

Perfect for Maryland bridges and Stabilizations

# 039-SPL-C - Mfg # SPL-C

Features:
For Permanent Stabilization of Teeth

SplintMat is bonded to the teeth for stabilization or placement of temporary restorations and is available in no waste rolls in nylon or stainless steel mesh.

Use SplintMat nylon mesh with your preferred light cure or self-cure composites. Splintmat stainless steel mesh is indicated for use with self-cure composites.

Contains: SplintMat: NYLON Mesh Grid - Roll, 5.5 mm X 1 meter (39 long)
POLY DENTINE SEALANT - PULPDENT

Features:
Seals and protects dentinal tubules. This product forms a thin, biocompatible physical barrier that seals the dentin and protects the pulp against acids and other irritants. It is virtually impenetrable by acids, cements, resins and dental restoratives. It also serves to insulate against thermal shock and to protect against micro leakage.

5TH GEN - DENTIN ENAMEL BONDING ADHESIVE - PRO-LINE

5 th Generation Dentin Enamel Bonding Primer/Adhesive (NOT self etching)
The adhesive incorporates aspects of primer and bonding resin in a single bottle designed to bond composites and compomers to dentin and enamel as well as treated amalgam, metal and ceramic surfaces.

After etching, penetration and saturation of the dentin and enamel are accomplished in 2 to 3 coats.

ESPE - 400616 Adper Prompt L Adhes 100pk

ESPE - Adper Prompt L-Pop self-etch adhesive Giant Pack 100/pkg L-Pop
Applicators #41926

Features:
Adper Prompt L-Pop is a single-step, unit-dose self-etch adhesive with a high bond strength to enamel and dentin suitable for bonding light-cured composite and compomer materials. The unique L-Pop delivery system of this bonding agent allows you to etch, prime and bond in a single step all in seconds.
Easier activation for a more consistent, reliable mix
Very low incidence of post-operative sensitivity
Higher viscosity for more uniform hybrid layer
Cures with any light source halogen, laser, plasma or LED

Specifications:
* Package Quantity: 100/Pkg

CLEAR SE BONDING - KURARAY

KURARAY - CLEAR SE BOND

5th Generation Bonding

Kuraray, after inventing the self-etching technique with Clearfil Liner Bond 2 in 1993, has surpassed their universally accepted total-etch technology with a new product - a new-generation self-etching primer and bonding system called Clearfil Se Bond. Clearfil Se Bond is a simplified, light-cure bonding system containing a water-based primer. The procedure time with Clearfil Se Bond is significantly reduced, while providing enhanced bond strength and sealing properties -- and, it can be used with all light-cured restoration. The unique "Outer Case" delivery system allows direct finger control of the contents.

Features & Benefits
* Secure, fast and easy to use
* One bottle of self-etching primer for effective one-step conditioning of cut enamel and dentin without rinsing
* No excessive decalcification
* Intraoral repairs of porcelain and composite with additional use of Clearfil Porcelain Bond Activator
* Effective marginal sealing for protection against micro-leakage
* High bond strength to dentin, enamel, metals and porcelain
* Indicated for composites, compomer

**KURARAY - 400747 ClearFil S3 Bond Plus 4ml**  
US$ 144.00

**Features:**
CLEARFIL S3 BOND PLUS is a light-cure, self-etching, one-step, fluoride-releasing bonding agent. Based on the same progressive adhesive technologies from the gold standard CLEARFIL SE BOND, you can expect minimal postoperative sensitivity.

With its one-bottle liquid, CLEARFIL S3 BOND PLUS dramatically simplifies bonding procedures. Along with Kuraray’s MDP technology, a new catalyst has been adopted; thereby, providing higher bond strength with improved working time.

It has minimal technique sensitivity, and is indicated for light-cure composites, root surface treatment and cavity sealing. It is exceptional for use in pedodontic restorative procedures where speed and comfort are extremely critical.

**CLEARFIL S3 BOND PLUS Kit Contains:**
- 1 Bond (4ml)
  - 1 Applicator brush (fine 50pcs)
  - 1 Dispensing dish
  - 1 Light-blocking plate

---

**DenTASTIC - PULPDENT**

**DenTASTIC UNO - One Step Wet Bonding**

5th Generation Light Cure

For all direct bonding light cure applications. UNO? is an effective, single-component adhesive for bonding to dentin, enamel, porcelain, metal, composite and other resins.

**DenTASTIC UNO-DUO Simplified Dual Cure Adhesive**

5th Generation Dual Cure

DUO is the dual cure catalyst for DenTASTIC? UNO?. Use UNO-DUO? for indirect restorations, core build ups, or
whenever self-cure or dual cure capability is indicated. Independent testing shows excellent results*

DenTASTIC All-Purpose Dental Adhesive System

4th Generation Dual Cure

DenTASTIC? is a reliable and easy to understand system for bonding to all tooth and restorative materials. The system has both light cure and dual cure capability. The hydrophilic adhesive primers (A, B & C) and the unfilled resin bonding agents (1 & 2) are offered as separate components. There is a unique metal primer (C), and the light cure resin bonding agent Part 1 can also be used to wet plastic instruments to prevent them from sticking to composites.

6th Generation Bonding

Self-etching, 2 Steps, Dual Cure to enamel and dentin with S-PRG. 6th Generation Adhesive A self-etching, fluoride releasing bonding system.

* S-PRG (Surface Pre-Reacted Glass Ionomer) technology that fully reacts with alumina silica glass particles.
* High levels of fluoride release and recharge.
* Excellent bonding to tooth structure.
* Bonds any composite to enamel and dentin for Class I-V and cervical erosions.
* Self-etching saves time and reduces post-operative sensitivity.
* Total procedure time: 35 seconds.
* High level of radiopacit.

**Features:**
The 2-step, self etching, fluoride releasing adhesive system features a unique Primer and Bonding Agent to provide an excellent bond to both enamel and dentin with a secure marginal seal.

**Created for...**

* Deep restorations (in conjunction with aesthetic restorative material) is recommended for bonding any composite to enamel and dentin for Class I, II, III, IV and V E storations, including cervical erosions.
* Restoration of hypersensitive and exposed root surfaces.
* Intra oral repair of fractured indirect restorations when used with M.L. Primer (MetalLink Primer).

## GC-FUJI - 108-002277 G-Bond Kit

**GC - FUJI G-Bond Kit**

**Enamel & Dentin Bonding**

**# 108-002277 - Mfg # 002277**

### 7th Generation Bonding

**Features:**

* 4-MET Monomer
* Phosphoric Acid Ester Monomer
* Minimal decalcification; almost no exposure to collagen fibers
* This "nano" level reaction produces an insoluble calcium compound for a better bond
* 5% filler seals tubules leads to fewer voids between the thin adhesive layer and the dentin, which minimizes microleakage and prevents microbial invasion
* "Nano Interaction Zone" Technology; an advanced formulation of Phosphoric Acid Ester Monomer, 4-MET Monomer, nanofilled particles, acetone, and water solvents that decalcifies the tooth, providing a wetting property. This diffuses monomer into the tooth structure, polymerizes, hardens when light-cured and creates an ionic bond with the apatite in the tooth structure.

### Benefits:

* For almost any application, in as little as 20-30 seconds, you're good to go
* Fast and easy application - just brush G-BOND onto the tooth's bonding surface, wait 5 to 10 seconds, then air thin with high pressure syringe air and light-cure for 10 seconds
* Virtually eliminates post-op sensitivity because dentin tubules are never exposed (due to 5% filler)
* 4-Met Monomer provides consistent bond strength to dentin
* Phosphoric Acid Ester Monomer provides consistent bond strength to enamel
* Better bond is less likely to deteriorate from enzymes contained in the mouth
* Easy clean-up and removal of adhesive overflow
* Completely coats all bonding surfaces even in an extremely shallow cavity; fewer voids
**GC - 400702 G-Bond Kit 5ml**

GC - Gbond Kit 5ml bottle - GC America - #002277 Gbond Kit - GC America
GC America - G-Bond Kit 5ml
Dentine Bonding
# 400702 - Mfg #002277

**Features:**
- GC G-BOND is a one component, one coat bonding system for light-cured composites.
- Simple 20-second application
- No postoperative sensitivity
- No marginal staining or discoloration
- Etch, desensitize, prime and bond in one easy step
- Consistent, reliable bond strengths to enamel and dentin

**Specifications:**
- Contains: 1 (5 ml) bottle of G-BOND
- Package Quantity: 1/Pkg
- Size: 5 ml Bottle

---

**OPTIBOND- KEER**

* OptiBond? Solo Plus is a single-component dental adhesive designed for both direct and indirect bonding applications. It is 15% filled with the same 0.4 micron filler found in the Kerr Point 4 composite. The filler not only reinforces the hybrid zone but also penetrates the dentin tubules, creating a true "structured bond" not found in unfilled or even "nano" filled dental adhesive systems. This unique dental bonding technology provides the highest level of protection against microleakage, while sustaining high bond strengths to a variety of surfaces.

* OptiBond? All-In-One simplifies the restorative procedure by providing superior adhesion to all surfaces and substrates for both direct and indirect applications - even indirect metal-based restorations when used with NX3 resin cement.

**Dentsply Euro - 400683 Prime & Bond NT 3.5ml.**

Dentsply - Prime & Bond NT 3.5ml. Single Btl. #60667273

Features:
Prime&Bond NT is a universal self-priming dental adhesive designed to bond light-cured composite materials and Dyract compomer materials to enamel and dentine as well as to metals and ceramic. Prime&Bond NT combines primer and adhesive in a single bottle. It also maintains excellent bond strengths and protection against microleakage. By mixing Prime&Bond NT with Self-Cure Activator, a universal, dual-cure self-priming dental adhesive system is obtained. This system is designed to bond dual- or self-cured composites to enamel, dentine, and restorative materials even in areas inaccessible to light.

Quantity: 3.5 ml/Bottle

**RIVA BOND- SDI**

Riva Bond LC is the next generation of adhesives. No longer do you have to put up with significant stress at the margins due to your beautiful restorations shrinking. No other adhesive can have high bond strengths AND significantly reduced stress at the restorative interface. Best of all, with Riva Bond LC your composite restorations will be long lasting.

**ESPE - 112233 Scotchbond Multi-Purp Adh 8ml**

US$ 160.00

**ESPE - Adper Scotchbond Multi-Purpose Adhesive**

**Enamel & Dentine Bonding**

# 112233 - Mfg # 7543-3009

4th Generation Bonding

**Features:**

Adper Scotchbond Multi-Purpose Adhesive is one part of our light cure dental adhesive system that is designed to handle difficult bonding situations, is fast and easy to apply and offers excellent bond strengths to a variety of surfaces.- Refill includes 8 ml bottle.

**Advantages:**

* Versatile adhesive system designed to handle difficult bonding situations such as bonding to sclerotic dentin and bonding in moist environments.
* Reduces microleakage that can contribute to post-operative sensitivity for increased patient comfort and doctor confidence.
* Offers excellent bond strengths to a variety of surfaces for reliable bonding performance.
* The system offers complete dental bonding with dual-cure capabilities when used with Adper Scotchbond Multi-Purpose Plus Activator and Adper Scotchbond Multi-Purpose Plus Catalyst.
* Easy-to-follow technique guides and color-coded, numbered vials make the system efficient and simple to use.
ESPE - 108-BOND Single Bond 3M Plus 6ml
ESPE - Adper Single Bond Plus Adhesive Refill
Enamel & Dentine Bonding
# 108-BOND - Mfg # 51102

5th Generation Bonding

Features:
Adper Single Bond Plus is a fast, easy and convenient total-etch, single-component bonding agent offering exceptional bond strength. Available in convenient unit-dose or easy dispensing bottle. Refill includes 6g vial and Instructions for Use.

Advantages:
* Excellent shear bond strength provides exceptional bonding performance.
* Easy-to-use unit dose - simply press one chamber and use.
* Nanofiller is stable and will not settle out of dispersion.
* Unique, easy-dispensing bottle permits visual inspection of exactly how much adhesive remains in the bottle.
* Cap snaps securely shut minimizing evaporation.
* No shaking required - use straight out of the vial.
* Ethanol/water-based adhesive maintains its shear bond strength over time to yield an outstanding shelf life.

Specifications:
* Adhesive Type: Total Etch
* Brand: Adper
* Delivery System: Vial / Bottle
* Material: Light Cure
* Product Type: Adhesive

Indications:
* All direct, light-cured bonding procedures.
* Indirect bonding procedures when combined with 3M ESPE RelyX ARC Adhesive Resin Cement.
* Root surface desensitization.
* Porcelain and composite repair.
* Bonding veneers in combination

ESPE - 400613 TransBond XT LC Adhe 4gm. Syr 4pk
ESPE - TransBond XT Light Cure Adhesive 4gm. Syringe Refill 4/pk. -
#712-036

Features:
Transbond XT Light Cure Adhesive bonds metal and ceramic brackets to tooth surfaces providing you with additional working time
for accurate bracket placement. The viscosity of Transbond XT adhesive was designed to prevent adhesive run-on and bracket skating that saves you money and reduces adhesive waste. 3M Uniteks adhesive-filled capsules and dispensing gun also provide for easy application, increased control and convenience. A syringe delivery system is available too. Best of all, the Transbond XT adhesives quick cure provides for immediate archwire tie-in so your patients and staff can experience shorter bonding appointments.

Specifications:

* Attribute Name: Value
* Adhesive Type: Ligth Cure
* Applications: Direct Bonding Custom Resin Base, Indirect Bonding Custom Resin Base.
* Bonding Type: Direct, Indirect
* Package Quantity: 4/Pkg
* Delivery System: Capsule, Syringe

**SHOFU - 668-1741 Ceraresin Bond Kit**

*SHOFU - Ceraresin Bond Kit*
*Porcelain Bonding (Silane)*
# 668-1741 - Mfg # 1741

**Features:**
- Ceraresin Bond is a bonding system specifically designed for the repair of ceramic, porcelain, acrylic, and C&B materials.
- Bonds all ceramic, porcelain, acrylic, resin composite, and C&B materials.
- Fast and easy procedures provide a durable bond.
- Works on both intra-oral and extra-oral procedures.
- Extremely resistant to moisture and thermal strains.

With this simple to use system, both dentists and laboratory professionals can securely and reliably bond various materials including light-cured laboratory composites such as Ceramage extra-orally, or even light-cured resin composites such as BEAUTIFIL Flow Plus for veneering or repair intra-orally. The material is extremely resistant to moisture and thermal strains providing a long lasting, durable bond.

**Kit includes:**
- 6ml of Bond
- 5ml of Bond 2
- 50 Microbrushes
- 5 Disposable V-Dish 0.1ml Unit Dose

**US$ 125.00**

**PROLINE - 016-020 Porcelain Bond Enhancer 10ml**

*PRO-LINE - Prime Dent Porcelain Bond Silane Enhancer 10ml*
*Porcelain Bonding (Silane)*
# 016-020 - Mfg # 016-020

**Features**
- A silane coupling agent that treats porcelain to give stronger bonds typically used after the porcelain surface has been etched with Prime-Dent Porcelain Etch Gel.

**US$ 26.78**
PULPDENT - 101493 Restoration & PFM Repair Kit
PULPDENT - EMPFM Restoration & PFM Repair Kit
- Includes 1.2ml syringe 5pk First-Coat (Silane) - Seal-n-Shine - Opaquer - Porcelain Etch Gel - Kool Dam - Accessories [P# EMPFM ] # EMPFM

PULPDENT - EMPFM Restoration & PFM Repair Kit
Porcelain Bonding (Silane)
# 101493 - Mfg # EMPFM

Features:
No bonding agents required. The latest generation of porcelain repair products uses First-Coat in place of silane. First-Coat is a solvent-free resin with strong bonds to ceramic and metal. Testing shows better results than silane.

All Surfaces, Fewer Steps, Save Time and Money
* Eliminates metal and ceramic primers, silane and bonding agents.
* Compatible with restorative composites.
* No solvents, no modifiers, no mixing, no mess.
* Can be cured with all curing lights.

Multi-Functional Kit Contains:
Embrace First-Coat
Unique one-step resin primer bonds chemically and mechanically to prepared ceramic and metal.
Contains no solvents.

Embrace Seal-n-Shine
Polishes, penetrates and seals leaving a glaze-like finish on restored teeth.

Embrace Esthetic Opaquer
A thin film spreads smoothly and masks out discolored tooth and ceramic surfaces. Light cures in 20 seconds.

Kool-Dam
Heatless liquid dam protects soft tissue, teeth and restorative surfaces. Remains flexible after curing.

Porcelain Etch Gel
Buffered 9.6% hydrofluoric acid gel etches porcelain in one minute

Quantity: Embrace Resoration & PFM Repair Kit:
1.2 mL syringe each First-Coat, Seal-n-Shine, Opaquer, Porcelain Etch Gel, Kool-Dam + accessories
PULPDENT - 101500 Silane Bond 4x1.2ml Syr Only
PULPDENT - Silane Bond Enhancer 4 x 1.2ml - Only syringes + 8 dropper tips - P# SIL #
SIL

US$ 81.84

SILANE BOND ENHANCER - PULPDENT
SILANE BOND ENHANCER - PULPDENT

Features:
For Bonding Composites and Resin Cements to Porcelain.
This single component material increases the bond strength of organic resins, such as composites and resin cements, to porcelain. Apply silane to the etched and dried porcelain surface. Conveniently dispenses one drop at a time from the syringe.
