Cements and Liners

Calcium Hydroxide OHCA

**ECCO - 113696 Calcium Hydroxide (USP) 4oz**

ECCO - Calcium Hydroxide (USP) 4oz Bottle - Powder of calcium hydroxide chemically pure. (OhCa Oh-Ca)

** Features:**
- Powder of calcium hydroxide chemically pure.

** Size:** 4 oz Bottle

**US$ 12.60**

---

**CAULK - 116600 Dycal Radiopaque Calcium Hydroxide**

DYCAL Radiopaque Calcium Hydroxide (Ohca) Comp Std. Pkg.- Ivory Color 1 Base - 13gr - 1 Catalyst - 11gr - Mixing Pad

**Dycal Calcium Hydroxide Liner Dentin Complete**

Calcium Hydroxide OHCA

#116600 - Mfg #623450

**Radiopaque Calcium Hydroxide Composition**
- Protects the pulp and promotes the formation of secondary dentin to ensure confidence in performance
- Saves time, and is strong at critical time of condensation
- Less vulnerable to oral fluids for excellent long-term results
- Easy to place with ability to flow where needed while saying in place when necessary
- Available in Self Cure and Visible Light Cure version

Dycal provides potential for improved esthetics, as well as clinically proven performance with quick set times and excellent handling characteristics. Dycal is offered in two shades, Ivory and Dentin, which allows for more natural looking esthetic restorations.

**Complete package (teal) includes:**
- 1 Base (13g)
- 1 Catalyst (11g)
- 1 Mixing Pad
- 1 Mixing/Placement Instrument

**US$ 32.55**

---

**PRO BLEND ULTRA CALCIUM HYROXIDE - PROLINE**

Pro-Blend ultra is a unique light-cured, radiopaque, dentin adhering liner and base material containing calcium hydroxide and calcium hydroxyapatite in a urethane dimethacrylate (UDMA) base.

It is a highly filled resin (for a liner) with minimal shrinkage and water absorption.

Pro-Blend ultra has a higher viscosity than conventional liners, eliminating the need for a ball-type applicator. Its superior strength and water insolubility (it won’t leach out) make Prime-Blend ultra the material of choice under composite, amalgams, gold, and etc.

Pro-Blend ultra is easily contoured with high-and low-speed hand pieces.

No more instrument-to-pad-to-mouth delivery. No more contamination of cavo-surface margin upon entry into cavity preparation!
Cements and Liners
Calcium Hydroxide OHCA

HYDROX - BOSWORTH
HYDROX - BOSWORTH / Keystone

Hydrox radiopaque calcium hydroxide paste is a rigid, self-setting cavity liner and pulp capping agent. Hydrox eliminates all chemical and thermal sensitivity by sealing dentinal tubules and protecting the pulp. Hydrox serves as a protective barrier that isolates the dentin and pulp from acid-containing cements and restorative materials. Works well under glass ionomers and will not affect amalgam or the polymerization of composites. The superior flowability of Hydrox permits uniform coverage and controlled placement into preparations.

Tips: Hydrox can be used as a temporary cement. Hydrox's high pH level acts to inhibit bacterial growth at the cavity wall. This property is particularly important for the treatment of teeth with complicated crown fractures, open apices, or root perforations.

Carrier Cements (accessories)

CORE MATERIAL MIXING TIPS - DEFEND

Tips are high performance for core material. Also includes 25 clear intra-oral tips. Available in 1:1 ratio.

Description:
* Tips 25 per bag
* Color: Brown
FINE MIXING TIPS AND INTRA ORAL TIPS - PRO-LINE

Includes:
* 25 Fine Mixing Tips
* 25 Fine Intra Oral Tips

Intraoral and mixing and Intra Oral tips

This double barrel automix syringe system reduces the amount of mixing tip waste found with cartridge delivered material.

COPAL VARNISH - PRO-LINE

COPAL VARNISH - PRO-LINE

Insulates against thermal and electric shock. Provides a strong bond between dentin and restoration.

Chloroform free formula of varnish and sealant.
HYDROXYLINE - CALCIUM HYDROXIDE CAVITY LINER - TAUB

Hydroxyline’s thin ‘varnish’ film forms a chemical and physical barrier that seals tubules and protects the pulp from acids in cements and acid etching solutions. Use it under both temporary and permanent cementation to protect the pulp. It will prevent thermal and ‘pulp’ shock.

Easy to apply - sets in 15 seconds or less- can be used under all filling materials including composites and amalgam. Its thin resinos film makes it highly suitable for both posterior and anterior composite restorations. The material will not soften up or wash out under the restoration. Use it under glass ionomer liners to eliminate sensitivity and give protection during etching. Hydroxyline eliminates the need for most bases and varnishes.

Hydroxyline is compatible with all resins and will not affect the color the resin.

Hydroxyline TC is a dentin colored film which maintains the composite resins’ esthetics for thin Class V restorations. It will not ‘whiten out’ the resin as other opaque liners do.

**LIGHT CURE LINER AND BASE - EC CO**

**LIGHT CURE LINER AND BASE - ECCO**

A fluoride containing light cure liner resin to protect dentin and serve as a base under all types of restorations.

On near exposures apply 0.5mm and cure - Add additional layers in 2mm increments.

**Cements and Liners**

**Cement Cleaners and removers**

**KEYSTONE - 034-1020100 Easy Removal Of Adhesive 4 oz**

**US$ 16.13**

KEYSTONE - Coated Abrasive Adhesive Solvent
Cement Cleaners and Removers
# 034-1020100 - Mfg # 1020100

**Features:**
The coated abrasive adhesive solvent is essential for removal and repositioning of bands on plastic model trimmer back plates. apply liberally to a cloth and rub on plastic back plate.

**Description:**
* It dissolves cyanoacrylate cements.
* Safe on skin, metal, plastic, glass, and porcelain.
* Non-corrosive, non-flammable, and non-staining.
* Available in a 4 oz

Us Dental Depot Is An Authorized Keystone Dealer In Us
TEMPORARY CEMENT REMOVER 6 ULTRASONIC SOLUTION - DEFEND

This ready-to-use solution requires no mixing. The strong, fast-acting formula removes cement and stone quickly and completely from instruments, trays and other appliances.

Description:

* Size: 1 Gallon Bottle
* Weight: 10 lbs

---

**Cements and Liners**

**DESENSIT**

---

**PULPDENT- 101505 Dentin Desensitizer 12ml bottle**

Size: 12ml bottle
Desensitizers GLUMA
# 101505 - Mfg # DES

**Features:**
Apply to all dentin surfaces, including cavity, crown and inlay preparations and cervical areas.
Compatible with all adhesives, composites, provisional and permanent dental cements

**Price:** US$ 64.00

---

**KULZER - 116586 GLUMA Desensitizer Bottle 5 ml**

Size: 5 ml bottle
Desensitizers GLUMA
# 116586 - Mfg : # 65872354

**Features:**
Gluma Desensitizer is indicated for treating cervical hypersensitivity and eliminating dentinal hypersensitivity. It is also used as a pretreatment to priming and bonding for direct composite restorations and prior to placing compomer and amalgam restorations. No mixing or curing required Can be used with all bonding and restorative materials in any situation

**Price:** US$ 127.05

---

**PHOENIX- 114464 Super Seal Des and Liner 4ml**

Size: 4ml bottle
Desensitizers GLUMA
# 114464

**Features:**
Super Seal is a unique formula that removes the smear layer- seals the tubules and desensitizes in one step

**Price:** US$ 52.45
Features:
Super Seal is a unique formula that removes the smear layer, seals the tubules and desensitizes in one step. No pumice cleaning or rinsing required. Because of its acidic nature Super Seal demineralizes the smear layer (both organic and mineral debris) and the peritubular dentin (outermost ring of very hard mineralized dentin of each tubule complex).
Reacts with the calcium hydroxyapatite to form a fine granular calcium oxalate precipitate within seconds; both within the dentinal tubules and on the surfaces of the vital dentin, enamel, and cementum. This precipitate is an acid-resistant liner that is biologically and chemically complexed with the underlying substrate of the vital dentin.

PRIME DENT - 115992 HEMA Desensitizer 7ml
PRIME DENT - Hema Desensitizer - Prime Dent
Desensitizers GLUMA
# 115992 - Mfg: # 018-011

Features:
Contains hema and benzalkonium chloride. Fast, effective way of sealing off dentinal tubules by combining with proteins and forming a physiologic barrier of protection. Benzalkonium choline adds an anti-microbial action to eliminate bacteria. Used as a normal part of resin bonding. Also effective for cervical sensitivity, root planning and scaling.
Prime-Dent Hema Desensitizer 7ml Bottle.

PHOENIX- 114465 Super Seal Des and Liner 8ml
PHOENIX - Super Seal Desensitizes and Liner 8ml - Super Seal is a unique formula that removes the smear layer- seals the tubules and desensitizes in one step

Features:
Super Seal is a unique formula that removes the smear layer, seals the tubules and desensitizes in one step. No pumice cleaning or rinsing required. Because of its acidic nature Super Seal demineralizes the smear layer (both organic and mineral debris) and the peritubular dentin (outermost ring of very hard mineralized dentin of each tubule complex).
Reacts with the calcium hydroxyapatite to form a fine granular calcium oxalate precipitate within seconds; both within the dentinal tubules and on the surfaces of the vital dentin, enamel, and cementum. This precipitate is an acid-resistant liner that is biologically and chemically complexed with the underlying substrate of the vital dentin.

Cements and Liners
Dual Luting Resin Cem.

COMPOSITE LUTING CEMENT SYRINGE KIT - PRO-LINE
COMPOSITE LUTING CEMENT SYRINGE KIT - PRO-LINE

Includes
* 1x 10g syringe
* 3x Mixing Tip
* 3x Intra Oral Tips

Auto-mix system, dual cure, filled multipurpose permanent cement, for use in final cementations of implant prosthesis, crown and bridges, inlays, onlays, veneers, cementation of post & pins and periodontal splinting.

Features and Benefits:
* Quick Cementation
Automix Handheld Syringe
* Convenient, economical and especially used for multi-operatory practices.
* No mixing, no air bubbles, no wasted material due to over mixing.
* Ensures, predictable, accurate, consistent and homogenous mix every time.
* Minimal heat generated (Protects pulps)
* Radiopaque (Easy identification on x-ray)
* Low Film thickness, provides easy placement of crowns & bridges
* Fluoride Release, reduces secondary caries.

Physical Properties:
* Working time: 2 minutes.
* Setting time: 5 minutes.
* Compressive strength: 266 MPa
* Flexural strength: 133 MPa

---

**MONOCEM - SHOFU**

**MONOCEM - SHOFU**

For All ceramics All metals and All types of posts
NOT recommended only for porcelain veneers MonoCem is dual cure
Unlimited working time 100% polymerization.
The MonoCem can also replace the Celibra Cement Automix syringe delivery system.

* Can Replace Celibra Cement
* Self-adhesive resin cement
* Self-etch primer.
* Hydrophilic
* Dual Cure
* New and improved
* 3 minute setting time
* Bonds to all substrates with high retention values
* Eliminates sensitivity and has high fluoride release
* Moisture tolerant and two second tack cure for easy clean-up
* 100% polymerization
* Very low film thickness (12m)

CLEAR AND BLEACH WHITE AVAILABLE

**KURARAY-100537 Panavia F 2.0 Intro Kit Light**

**Panavia F 2.0 Intro Kit Light Kurary America Inc (483KA)**

**Description:**

Panavia F2.0 Dual-Cure The new Panavia F2.0 is a self-etching, self-adhesive, dual-cure, fluoride releasing resin cement that can be cured with any Halogen, Plasma ARC or LED light. Panavia F 2.0 PASTE contains 2 photo initiators, providing a wider curing band with so you can use any of the currently available curing lights. Panavia F2.0, as with all Panavia resin cements, contains the same, proprietary MDP adhesive monomer that has been proven with over 20 years of clinical use. In addition to the legendary bond strength with metal restorative materials, this proprietary monomer also provides the strongest bond to any of the metallic-oxide ceramic restoration (Procera, In-Ceram, Cercon, Lava, Wolceram etc.)

[kurarai # 483KA] [P# M83-0416] [HS#7213775]

**Features & Benefits:**

- New self-etching primer
- Legendary desensitizing
- Strongest bond to metal-oxide ceramics
- MDP self-adhesive monomer

**Contains:**

- 1 PANAVIA F2.0 A Paste 1ml
- 1 PANAVIA F2.0 B paste 1ml
- 1 ED Primer II Liquid A 1ml
- 1 ED Primer II Liquid B 1ml
- 1 Oxyguard II 1.5ml
- 1 Mixing pad
- 1 Mixing spatula
- 1 Brush holder
- 1 Disposable brush tips (50 pcs.)
- 1 Mixing dish
- 1 Light-blocking plate
- 1 Disposable nozzles (5 pcs.)

**KURARAY-142-7214553 Panavia F 2.0 Standard Kit TC**

**Panavia F 2.0 Standard Kit TC - (Kurary America Inc #501ka) || Panavia F 2.0 Standard Kit TC #485**

**Description:**

Panavia 20 is an universal resin cement which shows high bond strength to tooth structures, metals and ceramics. Panavia 20 has been regarded as a guarantee for permanent adhesive technique in the areas of all-ceramics and metal restorations especially for high-quality and difficult restorations. It is recommended by leading universities as a premium product. The self-etching cement system prevents postoperative sensitivity and provides consistently good results. The anaerobic curing properties which do not begin until direct contact has been made with the restoration (no more contact with oxygen) and the flexible consistency make Panavia F 2.0 a popular aid in daily practice. Even after releasing fluoride, the cement maintains its high mechanical strength due to the special surface coating technology of sodium fluoride.

**CONTENT:**

- 1 PANAVIA F 2.0 A PASTE: 5.0 g (2.3 ml)
- 1 PANAVIA F 2.0 B PASTE: 4.6 g (2.3 ml)
- 1 ED PRIMER II Liquid A (4 ml)
- 1 ED PRIMER II Liquid B (4 ml)
- 1 ALLLOY PRIMER (1 ml)
- 1 OXYGUARD II (6 ml)

Accessories: 1 mixing plad, 1 spatula, 1 mixing dish, 1 brush tip handle, 200 disposable brush tips, 20 disposable nozzles, 1 light blocking plate

**KURARAY- 21 -panavia-ex Panavia-21 Ex Kit TC tooth col**

**Panavia-21 EX Paste 2 x 4 ML - KRY ( Dental Adhesive Kit Kurary # 455KA ) || Panavia 21 Ex**

**Refill TC tooth color**

**Mfg# 455KA**

Panavia 21 is a dental adhesive cement that directly bonds to cut enamel, dentin, composite, porcelain, base, semi-precious...
High bond strength to cut enamel, dentin, metal, silanated porcelain and cured composite

ED Primer for effective one-step conditioning of cut enamel and dentin without having to rinse

Easy handling

Convenient dispenser measures precise amounts of paste for consistent results

Anaerobic setting properties provide extended working time and trouble-free cleaning

Low film thickness for accurate setting

Radiopaque and insoluble

Great for cementing metals, porcelain, composites, posts, adhesion bridges/splints, and bonded amalgam restorations

RelyX - 116602 Unicem 2 Automix A2 Refil

RelyX - Unicem 2 Automix A2 U #116602 Mfg #3M-56895

RelyX Unicem 2 Automix A2 cement formula eliminates the need to pre-treat the tooth reducing the potential for errors in etching, priming and bonding. Perfectly matched endo tips allow precise application of the cement, directly into the root canal from bottom to top, greatly reducing the risk of air bubbles & voids. Convenient delivery systems Virtually no post-operative sensitivity Easy removal of excess Strong and moisture-tolerant.

RelyX - 116603 Unicem 2 Automix Trans Refil

RelyX - Unicem 2 Automix Refill Translucent U200 #116603 Mfg #3M-56897

Feature

* For simplicity powered by performance, rely on this enhanced, next-generation formula in an easy-to-use delivery system.

* RelyX Unicem 2 Automix Self-Adhesive Resin Cement represents the next generation of self-adhesive resin cements.

* This newcomer is based on the same chemistry as RelyX Unicem Self-Adhesive Resin Cement, the most clinically proven self-adhesive resin cement worldwide. This year it received the "2010 Top Long-term Performer" award by THE DENTAL ADVISOR®, which is only one of many awards the cement has won.

* The improved formulation remains closely related to its predecessor, while offering even more convenience due to its automix delivery system.

* The syringe dispenses the ready-mixed cement using mixing tips offered in three different sizes: Mixing tips for standard applications, endo tips ensuring a safe and void-free procedure when working in the root canal and for the cementation of inlays and onlays, special intra-oral tips are available as well.

Descriptions:

* Convenient dispensing.

* Time-saving - no etching, priming or bonding.
**Virtually no post-operative sensitivity.**

- Easy removal of excess.
- Optimal consistency.
- Strong and moisture-tolerant.

Except for 2- or 3-unit Maryland bridges and 3-unit inlay/onlay bridges. Selective etching is required to increase surface area for bonding.

**Permanent cementation of:**

- All-ceramic, composite or metal inlays, onlays, crowns and bridges.
- Post and screws
- 3 - unit inlay/onlay bridges.
- All-ceramic, composite or metal restorations to implant abutments.
- 2 -or 3-unit Maryland bridges.

**Kit Included:**

- 1 syringe 8.5 g Opaque color A3
- 15 mixing tips (Regular)
- 5 Mixing Tips (Wide)
- 5 Endo Tips.

---

**IVOCLAR - 076-628319 Variolink II System Kit Cement**

IVOCLAR - Variolink II Esthetic Cementation System Kit 

Variolink II is a resin composite luting cement for cementation of indirect all-ceramic, Ceromer, and resin composite restorations. It is especially recommended for the insertion of IPS Empress restorations. Variolink II is said to be dual cured.

Variolink II, the successor to Variolink, is purported to exhibit improved shade range, fluoride release, polishability, and decreased sensitivity to ambient light. Variolink II is available in six shades, three degrees of translucency, and three consistencies (low, high, and ultra-high viscosity).

The pastes are packaged in Luer-Lock Push Syringes, which gives users better control when dispensing the materials.

**Includes:**

- 6 - 2.5gram Base Syringes (Bleach XL, White, Transparent, Yellow, Brown, Opaque White)
- 4 - 2.5gram Catalyst Syringes (HV Transparent, HV Yellow, LV Transparent, LV Yellow)
- 12 - 0.1 gram unit dose Excite DCS
- 2gr syringe Total Etch
- 5gr Monobond Plue
- 2.5 gr Liquid Strip

---

**ESPE - 115586 Katec Cem Aplicap Std 50Caps**

Katec Cem Aplicap Standard Pack 50 Capsules Permanent Glass Ionomer Luting Cement

**Includes:**

- Katec Cem Aplicap Standard Pack 50 Capsules
- Ion-Core
- # 115586 - Mfg # 56060

**US$ 561.75**

**US$ 131.57**
**Features:**
Glass ionomer luting cement with fluoride release. Extremely low film thickness optimizes fit and marginal integrity. Bonds chemically to enamel and dentin.
Radiopaque.
Convenient and consistent Aplicap capsule delivery system.
A glass ionomer luting cement in a larger-size capsule for automatic mixing and dispensing, the cement offers fluoride release while its extremely low film thickness optimizes fit and marginal integrity.

**ESPE -115587 Ketac Cem Liquid 12ml Bottle**

ESPE -115587 Ketac Cem Liquid 12ml Bottle - # 0003722 #NAME? ESPE - Ketac Cem Liquid 12ml Bottle.
Ion-Core
# 115587 - Mfg # 37221

**Features:**
This permanent glass ionomer luting cement offers fluoride release, optimal fit and marginal integrity. Refill includes a 12ml vial of liquid.

**Specifications:**
* Glass ionomer luting cement offers chemical bond to enamel and dentin.
* Releases fluoride.
* High biocompatibility.
* Extremely low film thickness optimizes fit and marginal integrity.

**US$ 19.40**

**ESPE -115588 Ketac Cem Powder 33gr Bottle**

ESPE -115588 Ketac Cem Powder 33g Bottle - # 0003721 #NAME? ESPE - Cem Powder 33g Bottle.
Ion-Core
# 115588 - Mfg # 37211

**Features:**
This permanent glass ionomer luting cement offers fluoride release, optimal fit and marginal integrity. Refill includes a 33g bottle of powder.

**Specifications:**
* Glass ionomer luting cement offers chemical bond to enamel and dentin.
* Releases fluoride.
* High biocompatibility.
* Extremely low film thickness optimizes fit and marginal integrity.
* Radiopaque
* 33g Bottle

**US$ 41.90**

**ESPE -115589 Ketac Cem Triple Package**

ESPE -115589 Ketac Cem Triple Package # 37231 Or 37230 - Ketac-Cem - Triple Package - Glass Ionomer Luting Cement- 3 - 12 mL Liquid and 3 - 33 Gm. Powder ESPE - Ketac Cem Radiopaque Triple Package
Ion Core
#115589 - Mfg #37231

**Features:**
A radiopaque permanent cement used for cavity lining as well as the cementation of crowns, bridges, inlays, posts, screws and orthodontic bands.
* Glass ionomer luting cement offers chemical bond to enamel and dentin
* Releases fluoride
* High biocompatibility
* Extremely low film thickness optimizes fit and marginal integrity
* Radiopaque

**Triple Pack includes:**
3 (33 g) bottles of powder
3 (12 ml) vials of liquid
Mixing pads

**US$ 171.15**
ESPE-108-37010 Ketac Silver Aplicap Capsulas

Features:
A silver glass ionomer in a hand-mix format that contains no amalgam and offers high, long-term fluoride release as well as molecular adhesion to enamel and dentine to assure sealed, lasting restorations without the need for undercuts.

Specifications:
* Ketac-Silver Aplicap - Standard Package
* Glass Ionomer for Core Build-Ups, Small Posterior and Primary Tooth Restorations
* Contains No Amalgam
* 50 Capsules.

US$ 171.15

GC-FUJI - 108-000124 Miracle Mix Capsules 48 Refill

Features:
50 Refill Miracle Mix Capsules

Advantages
* Strong Direct Bond
* Simple Technique
* High Fluoride Release
* Won't Stain or Discolor Surrounding Teeth
* Easily Distinguishable from Tooth Structure
* Shrinks and Expands like Tooth Structure
* No-Mess Capsules or Powder-Liquid

US$ 291.90

GC-FUJI - 108-000239 Miracle Mix Combination Kit

Features:
Miracle Mix - Metal-Reinforced Crown & Core Build-Up Restorative - Build Kit
Miracle Mix - For lasting core build-ups, block-outs and repair, Miracle Mix offers the formula of glass ionomer cement with 100% fine silver alloy powder.

Contains:
15gm powder
10gm liquid
17gm alloy powder

Advantages
* Strong direct bond that will not chip when brimmed or cut
* Simple technique that only takes four minutes set to finish
* High fluoride release that reduces secondary decay
* Won’t stain or discolor surrounding teeth
* Easily distinguishable from tooth structure
* Shrinks and expands like tooth structure

US$ 152.25
GC-FUJI - 108-001887 Fuji Lining LC Paste Refill Pk

GC-Fuji Lining LC Paste Refill Pk (mFR#001887) Contains: One 7.0g (4.7ml) Paste Pak Cartridge of Fuji LINING LC [P G 05-02-62]

GC Fuji LINING LC Paste Refill Pak

Radiopaque Lining Material: Paste Refill Pak

GC Fuji LINING LC Paste Pak is the first light-cured, glass ionomer lining material available in a paste-paste formula that is used as a liner or a base under composite resin or amalgam restorations. It has a high-compressive strength, minimal polymerization shrinkage and extremely low solubility.

GC Fuji LINING LC Paste Pak minimizes sensitivity and provides long-term fluoride release. It bonds well to the tooth structure and composite, creating the ideal dentin substitute. This product also flexes and absorbs the stresses caused by the polymerization shrinkage, thermal expansion, and contraction of composite materials.

ESPE -108-7510 ESPE VitreBond Intro Kit

Vitrebond Light Cure Glass Ionomer Liner/Base Intro Kit - Intro kit contains: 1 [9 g] powder- 1 [5.5 ml] liquid- spoon and 2 mixing pads - A light-cure glass ionomer liner/base that combines light-cure convenience with true glass ionomer fluoride release and bond strength

ESPE - Vitrebond Light Cure Glass Ionomer Liner/Base Intro Kit

Ionomer Base Cements

# 108-7510 - Mfg # 7571

Features:

The Vitrebond convenient paste-liquid formula in our unique Clicker Dispenser offers the protection of a conventional glass ionomer liner without the mess of measuring.

Advantages:

Faster, easier dispensing and the right mix every time.

Conventional paste-liquid formula offers the protection of a conventional glass ionomer liner without the mess of measuring.

Award-winning Clicker dispenser assures a consistent mix.

Helps protect against post-op sensitivity: offers a strong bond to dentin, sealing the tooth structure to protect against microleakage.

Low microleakage comparable to original Vitrebond Liner/Base.

Fluoride release of a true glass ionomer.

Excellent handling characteristics for easy placement.

Cures in 20 seconds - a faster cure time than powder-liquid formulas.

Delivers excellent adhesion with any dental adhesive system.

Radiopaque.

No additional hardware required

Contains:

* 1 (9 g) powder-
* 1 (5.5 ml) liquid- spoon
* 2 mixing pads
Indications:
Liner/Base under direct and indirect restorations, including composite, amalgam, ceramic and metal restorations.

GLASIONOMER BASE CEMENT - SHOFU

Advantage!!!

US DENTAL DEPOT Inc is an Authorized SHOFU Dealer in the US.

</tbody>
</table>
Indications:
Given its simplicity and timesaving benefits, GC FujiCEM is the ideal cement for your luting procedures with metal-based restorations and simple ceramic inlays.

The recipe for its success?
With its own unique dispenser, FujiCEM creates a complete luting 'system' that not only simplifies the luting process, but also saves you time and helps ensure a perfect result.
Looking for added flexibility and ease of use? FujiCEM proudly presents the new Automix option. With FujiCEM Automix, you transfer an even mix directly into the restoration. It’s faster and easier than mixing by hand - without voids or risk of post-op sensitivity.

Developed by GC, a leading manufacturer of high quality, technically advanced luting cements, FujiCEM has built its reputation on successful clinical results during its seven years on the market.

**FUJI PLUS CAPS - GC**

**FUJI PLUS CAPS - GC**

**Features:**
GC Fuji PLUS is a resin-reinforced, glass ionomer luting cement designed for final cementation of metal, porcelain-fused-to-metal, metal-free crowns, bridges, inlays and onlays.
The GC Fuji PLUS bonds chemically and mechanically to tooth structure and all types of core material.
The GC Fuji PLUS simple placement technique produces significantly higher bond strengths than conventional glass ionomer cements while maintaining the favorable characteristics of glass ionomers-fluoride release, low coefficient of thermal expansion, and biocompatibility to tooth structure and soft tissues.

For indirect metal-free restoration that recommend a resin-reinforced / resin-modified glass ionomer for final cementation - cementable reinforced all ceramic crowns like PROCERA or cementable composite resin restoration like GRADIA.

The use of optional Fuji PLUS Conditioner prepares the bonding surface, which dramatically increases the bond strength and reduces the chance of pulpal sensitivity.

A 20 second application of Fuji PLUS Conditioner removes smear layer with a mild citric acid etchant and seals dentinal tubules with its ferric chloride component.

**Package:** 50

**Features:**
* 2 Cartridge pack ( no mixing tips )
* Resin Modified Glass Ionomer Cement Paste Pak

GC Fuji/CEM 2 is a second-generation, Self-cure resin modified glass ionomer luting cement. Following ten years of clinical success with GC Fuji/CEM, this product is powered by F2 Flex Fuse Technology, which incorporates new high-elastic crosslinking monomers with a modified filler-surface treatment that increases strength properties.

**Product Information:**
DeSystem
**Ionomer Luting Cements**

The GC FujiCEM 2 is indicated for a broad array of indirect restorations including all types of metal-, rein-, alumina- and zirconia-based inlays, onlays, crowns and bridges.

GC FujiCEM 2 delivers superior bond strength which allows extra time for completing more restorations.

The GC FujiCEM 2 automix paste pak dispensing system ensures a consistent mix every time, allowing you to place every restoration with the confidence that it will last. Fast, easy to use and stronger than ever, the new GC FujiCEM 2 from GC America is the ideal luting cement for all direct restorations.

---

**GLASIONOMER CX - SHOFU**

**Advantage**

An enhanced Glass Ionomer luting cement with prolonged working time. Indicated for cementing crowns, inlays, long span bridges and orthodontic appliances.

Prolonged working time with no change in viscosity followed by a Snap-Set Low film thickness (20) with high compressive strength (177 MPa). Bonds to both dentin and enamel to provide an excellent marginal seal to overcome post-operative sensitivity. High fluoride release. Radiopaque. Easy mixing, handling and resistant to water contamination at the initial stage.

US DENTAL DEPOT Inc is an Authorized SHOFU Dealer in the US.

### ESPE - 115593 Ketac-Fil Plus Aplicap Asst

**Product Details:**
- **Code:** 115593
- **Name:** Ketac-Fil Plus Aplicap
- **Price:** US$ 154.35

**Features:**
- Radiopaque conventional glass ionomer filling material in a unique Aplicap delivery system offers high fluoride release and helps achieve virtually invisible anterior restorations.
- Provides molecular bond to enamel and dentin to guarantee a tight marginal seal.
- Offers high fluoride release.
- Radiopaque.
- Consistent, easy and unit-dose dispensing with high visibility during placement.
- Minimal preparation.
- Available in eight aesthetic shades to better match existing tooth structure.

**Indications:**
- Class III and Class V restorations.
- Small Class I fillings.
- Wedge-shaped defects.
- Core build-ups.

### Mixing Pads Cements (access)

**Description:**
Mixing Pads are designed to be used in the mixing and kneading of dental material such as impression material, cements or resin-based composites.

Orthodontic Cements

PROLINE - 011-027 One-Step DC Ortho
Bonding kit

PROLINE - One Step Orthodontic Adhesive System
Orthodontic Cements
# 011-027 - Mfg # 011-027

Features:
A unique composite resin system for bonding plastic, metal or porcelain orthodontic brackets to etched enamel.
The highly filled paste features a tacky viscosity that flows well and eliminates bracket flotation.

Benefits and Features:
* Maximum strength within five minutes
* Bonds all types of Brackets
* Paste available in economical syringes

Includes:
* 2 x 5g Paste Syringes
* 1 x 7ml Primer
* 1 x 7ml Etchant Liquid
* 1 x Instructions
* The Catalyst Resin/Paste system sets on contact, giving the clinician complete control. The primer also helps to seal the etched enamel.
* The cohesive strength of the adhesive is stronger than the bond to the tooth. Allowing for one-piece removal after orthodontic treatment.

US$ 20.86
**PRIME DENT - 116021 PRIMEDENT VLC Ortho Bondi Kit**

PRIME DENT VLC Light Cured Orthodontic Orthodontic Cements
# 116021 - Mfg # 012-024

**Features:**
A unique Light Cure Composite resin system for bonding plastic, metal or porcelain orthodontic brackets to etched enamel. The highly filled paste features a tacky viscosity that flows well and eliminates bracket flotation.

**Includes:**
* 2 x 5g Paste Syringes
* 1 x 7ml Primer
* 1 x 7ml Etchant Liquid
* 1 x Instructions

**Physical Properties**
* Light Cure Time: 30 Seconds
* Compressing Strength: 300MPa
* Flexural Strength: 140MPa
* Shear Bond Strength: 21MPa

The Catalyst Resin/Paste system sets on contact, giving the clinician complete control. The primer also helps to seal the etched enamel. The cohesive strength of the adhesive is stronger than the bond to the tooth. Allowing for one-piece removal after orthodontic treatment.

**US$ 22.03**

HY-BOND ZINC PHOSPHATE CEMENT - SHOFU

Combines tannin fluoride with high compressive strength to produce an innovative material. Excellent for seating permanent prostheses. A superior zinc phosphate cement containing tannin fluoride and offering high compressive strength.

Specifications:
* Seals dentinal tubules and minimizes post-operative sensitivity
* Excellent for seating permanent prostheses
* Film thickness (25m)
* High compressive strength (98 MPa)
* High level of radiopacity
* Apply directly to prepared dentin
* Neutralizes the harshness of phosphoric acid

ZINC PHOSPHATE CEMENT - FLECK’S

Features:
Flecks Zinc Phosphate Cement is a superior cement that is not matched anywhere on the market. Since the advent of zinc phosphate cement, many other types of cement have been introduced. None, however, has demonstrated clinical superior in terms of strength, resistance to dissolution, and overall retention like Flecks Zinc Phosphate Cement has. And of all zinc phosphate, Flecks is the leading brand and cement of choice of dentists.

Available colors: Snow White, Light Yellow, Yellow, Golden Yellow, Light Gray, Golden Brown, Ceramic Blend.

Cements and Liners

Resin Cements A+B

**SHOFU- 113823 ML Metal Primer 5ml**

SHOFU - ML Metal Primer 5ml - ensures secure bonding of precious and non-precious alloys - 5ml ( #1740 )

Resin Cements A+B

# 113823 - Mfg # 1740

**Features:**

SHOFU has developed the M.L. Primer as a secure and durable adhesive system for bonding veneering composite and all common dental alloys.

It is easy to handle and suitable for nearly all indications, as it can be used intra and extra orally.

**Indication:**

Production and repair of resin veneered restorations repair of PFM restorations production and repair of chrome cobalt dentures or metal attachments bonding and repairing of metal restorations (inlays, onlays, crowns and bridges), metal splints, metal posts and cores with dental adhesive resin or bonding / filling material

**Benefits:**

* Intra and extra oral use
* Easy handling
* Rapid processing
* Secure composite / alloy bond on all common dental alloys
* Thin layer
* No additional equipment is required
* No grey shadows in the bonding area

US DENTAL DEPOT Inc is an Authorized SHOFU Dealer in the US.

**RESICEM - SHOFU**

**METAL ZIRCONIA PRIMER- BONDING TO ZIRCONIA**

ResiCem is an adhesive cementation system with outstanding physical properties for all types of framework and restorative materials.

As the percentage of all-ceramic restorations continues to grow and the demand for aesthetic dentistry increases, Shofu introduces ResiCem. Modern framework materials, such as zirconia and alumina, require modified procedures, as well as appropriate instruments and tools, to work on and integrate all-ceramic restorations.

Proper adhesive cementation is critical to the long-term clinical success of these highly aesthetic restorations. ResiCem is an adhesive cementation system with outstanding physical properties for all types of framework and restorative materials.

**Benefits:**

* Excellent adhesion and aesthetics
* Customize to be universal for all materials
* Self-conditioning
* High fluoride release
* Very low film thickness (9m)

US DENTAL DEPOT Inc is an Authorized SHOFU Dealer in the US.

## SPATULAS

### SHOFU- 111937 Cement Spatulas (pk 6)

SHOFU - Cement Spatulas (Pk 6) (#1165) SHOFU - Cement Spatulas - 6Pk
Spatulas 4 Cement (Access)
# 111937 - Mfg # 1165

Features:
Cement spatulas

US DENTAL DEPOT Inc is an Authorized SHOFU Dealer in the US.

### PROLINE - 030-001 Composite Mixing Spatula 100pk

PROLINE - Mixing Spatulas
Spatulas 4 Cement Accessories
# 030-001 - Mfg # 030-001

Feature:
Composite mixing Spatulas 100pk
Disposable plastic mixing spatulas for mixing pastes

**GC-FUJI - 026-135001 GC Coe-Pak - Standard Set**

**FEATURES**

- Resilient hardness to resist fracture or breakage
- No jagged edges to endanger patient
- Eugenol-free
- No offensive taste, odor or burning
- Smooth, cohesive mix
- Easy to form desired intra-oral shapes

The NDS version (New Delivery System) eliminates manual mixing and provides a consistent mix for immediate placement.

- Automix NDS:
  - Less waste
  - Setting time 10 minutes
  - Hard and fast set are ready in one minute
  - Won't stick to gloves
  - Two Year shelf-life
  - Long-lasting and reliable

**GC-FUJI - 108-135301 Coe-Pak Standard Pkg.Hard/Fast**

Gc-Fuji- Coe-Pak Hard & Fast - (Mfr#135301) Periodontal Dressing in tubes - Hard & Fast Set: ready for use within 1 min. - setting time 10 min. Two component material for wound dressing- to cover stitches or to stabilize loose teeth.

**GC-FUJI - 026-135001 GC Coe-Pak - Standard Set**

GC-Fuji- Coe-Pak Periodontal Dressing in tubes - Regular Set: ready for use within 3 min.- setting time 30 min.- Two component material for wound dressing- to cover stitches or to stabilize loose teeth [ 205-9194 ]

**GC-FUJI - 108-135301 Coe-Pak Standard Pkg.Hard/Fast**

COE-PAK Automix Hard & Fast

COE-PAK AUTOMIX HARD AND FAST PERIODONTAL DRESSING STANDARD PKG

Surgical Dressing & Periodontal Pack

COE-PAK Automix is a eugenol-free, surgical dressing and periodontal pack that has no burning sensation, no unpleasant taste or odor, and offers proven protection to surgical sites.

The COE-PAK Automix product promotes cleanliness and healing. Plastic and cohesive, ropes of any length or thickness can be formed. The smooth texture allows this product to adapt closely to the teeth and tissue in order to protect the wound. It sets with resilient, non-brittle hardness.

**GC-FUJI - 026-135001 GC Coe-Pak - Standard Set**

COE-PAK PERIODONTAL DRESSING STANDARD PKG

Surgical Dressing & Periodontal Pack

COE-PAK Automix is a eugenol-free, surgical dressing and periodontal pack that has no burning sensation, no unpleasant taste or odor, and offers proven protection to surgical sites.

The COE-PAK Automix product promotes cleanliness and healing. Plastic and cohesive, ropes of any length or thickness can be formed. The smooth texture allows this product to adapt closely to the teeth and tissue in order to protect the wound. It sets with resilient, non-brittle hardness.

Cements and Liners

**TEMP FILL**

### 3M ESPE - 113695 CAVIT-G 28 gr Jar

Features:
A self-cured temporary sealing compound for the temporary restoration of cavities.

Applications:
Cavit G: Completely removable without burs: Inlay preparation.

Benefits:
Proven filling material for temporary fillings.
Simple to apply with filling instrument.
Quick and void-free curing in a moist environment.
Slight expansion of the filling material ensures a well-sealed margin

Cost: US$ 20.16

### META- 107679 Hydrof.Tempor.Filling Mat.40gr

META MD-Temp White 40gr Temporary Filling Material # 107679

Hydraulic Temporary Restorative Material

Features
- Easy application and removal
- Hermetic seals the cavity
- Excellent stability when set
- Proper crush strength
- Shelf life: two years from the products date

Composition
- Polyvinyl Acetate, Zinc Oxide, Zinc Sulfate, Ethanol

Quantity: 40gr white past in jar

Cost: US$ 10.40
### HY-BOND POLYCARBOXYLATE TEMPORARY CEMENTS - SHOFU

A unique temporary polycarboxylate formula that 100% of independent evaluators rated Excellent or Good.

Special For Metacrylate Provisionals.

79% of independent evaluators said they would switch, "It's easier to clean-up and easier to remove". Excellent for temporary crowns, bridgework, implant prostheses, long-term provisional and temporary cementation of permanent restorations.

**Specifications:**
- Eugenol-free
- Helps prevent microleakage and improves the marginal seal
- Excellent bonding strength for provisional restorations
- Fluoride additive for protection of tooth structure and reduction of post-operative sensitivity
- Economically priced compared to other leading brands
- Results from a recent study by an internationally respected, independent research institute.

US DENTAL DEPOT Inc is an Authorized SHOFU Dealer in the US.

### NON EUGENOL TEMPORARY CEMENT - PRO-LINE

Cementation of crowns, bridges and splints. Retention of temporary crowns, sealing dressing in teeth during root canal therapy procedures. Trial cementation of permanent restorations prior to final insertion. Testing of interproximal contact prior to final placement.

**Advantages:**
- Different outlets prevent cross contamination
- Efficient mixing reduces waste
- Radiopaque
- Non-Eugenol for use in cases where a Eugenol temporary cement is not recommended
- Protects the gingival tissue
- Salivan resistant
- Excellent handling properties
- Sewerly resists the forces of mastication to enhance patients comfort
- Insoluble in mouth fluids and retains a tight marginal seal to prevent seepage of these fluids under the restorations. The cement will withstand functional stresses and permit ease of removal.
- In addition it has sufficient flow to facilitate complete seating of the restorations. The product is intended for use less than 30 days.

### KERR- 108-33351 TempBond Clear Autmx Syr. 1pk

**Features:**
- This product is an original Kerr Brand - Factory sealed - With at least one year of valid
- TempBond Clear is eugenol free allowing for its use with resin luting cements and is easy to mix and clean up, leaving no residue.
- As it is resin based, a much stronger bond is achieved, but removal, when required, is fast and trouble-free.
- TempBond and TempBond NE are available in automix syringe, tube delivery and Unidose.
- TempBond withstands mastication, seals the temporary restoration and prevents seepage, yet affords easy removal when desired.

**Contains:**
- 1 syringe 5ml
- 10 mixing tips

**US$ 65.10**

### KERR- 108-33217 TempBond NE Autmx Syr. 2pk

**Features:**
- This product is an original Kerr Brand - Factory sealed - With at least one year of valid
- TempBond NE is a non-eugenol temporary cement will not inhibit the polymerisation of resin cements and acrylic temporaries and offers an option for patients allergic to eugenol.
- It provides the same flow and retentive properties of TempBond.
- TempBond and TempBond NE are available in automix syringe, tube delivery and Unidose.
- TempBond withstands mastication, seals the temporary restoration and prevents seepage, yet affords easy removal when desired.

**Contains:**
- 2 syringes 11.7gr each
- 20 mixing tips

**US$ 85.05**

### KERR- 108-21370 TempBond NE Tube 50gr

**Features:**
- This product is an original Kerr Brand - Factory sealed - With at least one year of valid
- TempBond NE is a non-eugenol temporary cement will not inhibit the polymerisation of resin cements and acrylic temporaries and offers an option for patients allergic to eugenol.
- It provides the same flow and retentive properties of TempBond.
- TempBond and TempBond NE are available in automix syringe, tube delivery and Unidose.
- TempBond withstands mastication, seals the temporary restoration and prevents seepage, yet affords easy removal when desired.

**Contains:**
- 1 Tube Base (50 g)
- 1 Tube Accelerator (15 g)
- 1 Mixing Pad

**US$ 37.80**

  - Mfg # 33215
  - Contains: 2 syringes 11.8gr each + 20 mixing tips.
  - Features:
    - Smooth application.
    - Exceptional handling.
    - Easy removal when desired.
  - Indicated for temporary crowns, bridges or splints.

- **KERR- 108-00370 TempBond Original Tube 50gr**
  - Mfg # 00370
  - Contains: 1 Tube Base (50g), 1 Tube Accelerator (15g), and 1 Mixing Pad.
  - Features:
    - Smooth flow.
    - Exceptional handling.
    - Easy removal.

- **3M - 3505 RelyX Aplicap 50 Pk ref.**
  - Mfg # 56818
  - Features:
    - Capsule A2.
    - Universal Shade Refill, 56818.
  - Advantages:
    - Time-saving.
    - No etching, priming or bonding.
    - Virtually no post-operative sensitivity.
    - Easy removal of excess.
    - Optimal consistency.
    - Strong and moisture-tolerant.

*Except for 2- or 3-unit Maryland bridges and 3-unit inlay/onlay bridges. Selective etching is required to increase surface area.*
For bonding:
Indications: Permanent cementation of:
All-ceramic, composite or metal inlays, onlays, crowns and bridges.
Posts.
3 - unit inlay/onlay bridges.
All-ceramic, composite or metal restorations to implant abutments.
2 - or 3-unit Maryland bridges.

FUSION-ZR VENEER CEMENT - TAUB

FUSION-Zr is self-adhesive, light cure veneer cement and is indicated for the adhesive cementation of all-ceramic restorations, Lithium Disilicate and CAD/CAM type materials, where light curing is desired.

SPEED-SET - Highly light sensitive, cures completely and fast.

FUSION-Zr can be used on all porcelain crowns.

Ultra grip placement gives FUSION-Zr a unique stay-put viscosity that holds veneers in place.

Easy peel-a-way cleanup.

Cements and Liners

ZOE & Zinc Cements

**HY-BOND ZOE TEMP CEMENT - SHOFU**

**HY-BOND ZOE TEMP CEMENT - SHOFU**

Features:
- Tannin fluoride seals the dentinal tubules, reduces post-operative sensitivity
- Helps prevent the development of caries and the decalcification of dentin and enamel
- Excellent handling for cementing temporary crowns or filling materials
- High level of radiopacity
- Sets up promptly even in presence of moisture
- Easy to mix and clean-up

Combines tannin fluoride with high compressive strength to produce an innovative material Excellent for seating permanent prostheses.

**REFILLS**

**DENSPLY - 116482 IRM - Intermed Restor Material**

DENSPLY - 116482 IRM - Intermed Restor Material

IRM - Intermediate Restorative Material - powder 38g and liquid 15ml - Zinc oxide-eugenol with polymer reinforcement. Temporary filling material. Dentsply Caulk (IRM -) DENSPLY - IRM Intermediate Restorative Material - Powder 38g and liquid 15ml

Features:
RM-Intermediate Restorative Material is a polymer-reinforced zinc oxide-eugenol composition restorative material designed for intermediate restorations intended to remain in place for no longer than one year. It may also be used as a base under restorative materials and cements that do not contain resin components.

Composition:
- Zinc Oxide
- Poly-Methyl Methacrylate (PMMA) powder
- Pigment

US DENTAL DEPOT Inc is an Authorized SHOFU Dealer in the US.
Material Liquid:
* Eugenol
* Acetic Acid

**ECCO - 115141 Zinc Oxide powder 4 oz**

ECCO- Zinc Oxide 4oz powder only  ( 120 grs ) [ cement OxZn OZN OZn ]  ECCO - Zinc Oxide Powder Only - 4oz (120g )

**ZOE & Zinc Cements**

# 115141 - Mfg # 301-7804

**FeatureS:**
Zinc Oxide Powder is high in quality and purity. Its very fine, amorphous white or yellowish-white color that's free from gritty particles

**Indications:**
* Used for temporary dressing
* Mixed with eugenol and is used as a temporary cement
* Temporary fixation of crowns and bridges
* Ideal cavity liner under most restorative materials

**Composition**
Powder : Pure Zinc Oxide dental Grade

**Product Benefits:**
* Extra fine
* Arsenic free
* Makes a smooth paste with eugenol
* Provides sufficient compressive strength
* Forms a sedative dressing or lining under non composite resin

US$ 6.30

**ZINC OXIDE EUGENOL CEMENT KITS - PROLINE**

**ZINC OXIDE EUGENOL CEMENT KITS - PROLINE**

* This cement has a sedative effect on the pulp and is especially useful for cementation on prepared teeth with exposed dentinal tubules.
* The addition of polymers as reinforcing agents have transformed it into a final cement and intermediate restorative material with a compressive strength of 5400 psi.
* Offers excellent adhesion and easy removal.
