Cements and Liners

10.52

**PULPDENT - 101505 Dentin Desensitizer 12ml bottle**

- **Features:**
  - Contains 5% Glutaraldehyde, Fluoride and Water
  - Apply to all dentin surfaces, including cavity, crown and inlay preparations and cervical areas.
  - Compatible with all adhesives, composites, provisional and permanent dental cements

- **Contains:** 12 ml bottle

**KULZER - 116586 GLUMA Desensitizer Bottle 5 ml**

- **Features:**
  - Gluma Desensitizer is indicated for treating cervical hypersensitivity and eliminating dentinal hypersensitivity. It is also used as a pretreatment to priming and bonding for direct composite restorations and prior to placing comomer and amalgam restorations. No mixing or curing required. Can be used with all bonding and restorative materials in any situation

**PRIME DENT - 115992 HEMA Desensitizer 7ml**

- **Features:**
  - Contains hema and benzalkonium chlorine. Fast, effective way of sealing off dentinal tubules by combing with proteins and forming a physiologic barrier of protection.
  - Benzalkonium choline adds an anti-microbial action to eliminate bacteria.
  - Used as a normal part of resin bonding.
  - Also effective for cervical sensitivity, root planning and scaling.

US$ 128.00

US$ 71.63

US$ 12.75
SUPER SEAL - PHOENIX

Features:
Super Seal is a unique formula that removes the smear layer, seals the tubules and desensitizes in one step. No pumice cleaning or rinsing required. Because of its acidic nature Super Seal demineralizes the smear layer (both organic and mineral debris) and the peritubular dentin (outermost ring of very hard mineralized dentin of each tubule complex).
Reacts with the calcium hydroxyapatite to form a fine granular calcium oxalate precipitate within seconds; both within the dentinal tubules and on the surfaces of the vital dentin, enamel, and cementum. This precipitate is an acid-resistant liner that is biologically and chemically complexed with the underlying substrate of the vital dentin.

Band Cements all types

PRIMEDENT - 123491 BAND CEM DC Glass Ion Kit A2 US$ 18.00
PRIME-DENT Dual Cure Glass Ionomer Band Cement
Ionomer Cement (Water Mix)
# 123491 - Mfg #015-028

Features:
A dual cure composite resin cement ideally suited for cementing metal molar bands. Chemically bands to both tooth structure and metal band to create compressive strength reducing washout and loose bands. The cement ideally mixed and has no strong odor or aftertaste. The adhesive can be light cured to immediately set band in place. Without light activation a complete set is achieved in five minutes. Contains fluoride for added tooth protection. Easily dispensed from economical screw syringes or in smart auto-mix system.

Kit contains:
10gr Syringes A2 Band Cement
5 Mixing tips
5 Intraoral tips and IUF
CORE MATERIAL MIXING TIPS - DEFEND

Tips are high performance for core material. Also includes 25 clear intra-oral tips. Available in 1:1 ratio.

FUJI II LC CAPS - SEPTODONT

FUJI II LC CAPS - SEPTODONT
In the crown: temporary enamel restoration, permanent dentin restoration, deep or large carious lesions, deep cervical or radicular lesions, pulp capping, pulpotomy.
In the root: root and furcation perforations, internal/external resorptions, apexification, retrograde surgical filling.
* Sets in 10 - 12 minutes
* Versatile usage: endodontic repair and restorative procedures.
* Natural micro mechanical anchorage for excellent sealing properties without surface preparation.
* Similar mechanical properties and mechanical behavior as human dentin.
* 3.5mm Aluminum radiopacity for easy short and long term follow-up.

Available: 5- Pk/ 15- Pk
PULPDENT - 039-IL-CO GlassCore Ionom Cem Liquid 15ml  US$ 15.62

PULPDENT - GlassCore Glass Ionomer Cements Liquid- 15ML # ICO-L

Cavity Liners
# 039-IL-CO - Mfg # ICO-L

Features:
* For ultra-strong core build ups and for restoring missing tooth aspects
* Biocompatible to pulpal tissue. Compressive strength: 33,000 psi.
Contains no silver. Light blue tint for contrast. Radiopaque

Contains: 15ML Liquid

---

HYDROXYLINE - CALCIUM HYDROXIDE CAVITY LINER - TAUB

Hydroxyline's thin 'varnish' film forms a chemical and physical barrier that seals tubules and protects the pulp from acids in cements and acid etching solutions. Use it under both temporary and permanent cementation to protect the pulp. It will prevent thermal and 'pulp' shock.

Easy to apply - sets in 15 seconds or less- can be used under all filling materials including composites and amalgam. Its thin resinous film makes it highly suitable for both posterior and anterior composite restorations. The material will not soften up or wash out under the restoration. Use it under glass ionomer liners to eliminate sensitivity and give protection during etching. Hydroxyline eliminates the need for most bases and varnishes.

Hydroxyline is compatible with all resins and will not affect the color the resin.

Hydroxyline TC is a dentin colored film which maintains the composite resins' esthetics for thin Class V restorations. It will not 'whiten out' the resin as other opaque liners do.

**LIMELITE LC CAVITY - PULPDENT**

Features:
- Fluoride releasing - Radiopaque - Universal Shade
- Contains Hydroxyapatite in a urethane dimethacrylate resin
- Specially formulated for use with adhesives, composites and traditional restorative materials,
- Lime-Lite contains hydroxyapatite in a urethane dimethacrylate resin. It releases calcium, hydroxyl, phosphate and fluoride ions, which are known to be beneficial to tooth structure, to stimulate secondary dentin formation and to have cariostatic properties.
- Light cure base/liner - sets extremely hard
- Chemically bonds to adhesives and composites
- Releases favorable calcium, hydroxyl, phosphate and fluoride ions

PRO BLEND ULTRA CALCIUM HYDROXIDE - PROLINE

Pro-Blend ultra is a unique light-cured, radiopaque, dentin adhering liner and base material containing calcium hydroxide and calcium hydroxyapatite in a urethane dimethacrylate (UDMA) base.

It is a highly filled resin (for a liner) with minimal shrinkage and water absorption.

Pro-Blend ultra has a higher viscosity than conventional liners, eliminating the need for a ball-type applicator. Its superior strength and water insolubility (it won’t leach out) make Prime-Blend ultra the material of choice under composite, amalgams, gold, and etc.

Pro-Blend ultra is easily contoured with high-and low-speed hand pieces.

No more instrument-to-pad-to-mouth delivery. No more contamination of cavo-surface margin upon entry into cavity preparation!

CALCIUM HYDROXIDE POWDER - PULPDENT

Features:
Pulpdent Calcium Hydroxide USP Powder can be used in pharmaceutical applications. Calcium is vital for strong bone and teeth formation. It also helps maintain a regular heartbeat and transmission of nerve impulses. Pulpdent Calcium Hydroxide USP Powder can be mixed into paste for apexification procedures, direct and indirect pulp capping, and as a sub-base under restorations.

PULPDENT - 039-PCL Cavity Liner U-Thin 15ml

PULPDENT - Cavity Liner - Ultra-Thin Calcium Hydroxide Liner and Pulp Protector 15Ml Bottle # PCL US$ 38.32

Features:

Cements and Liners

CATALOG 6510 - oct/09/2018
Pulpdent calcium hydroxide cavity liner offers three-way protection, by desensitizing the dentin, neutralizing acids, and completely filling dentin tubules with bacteriostatic, bactericidal calcium hydroxide. It stimulates the formation of sclerotic and reparative dentin, which are naturally desensitizing; apply it after taking impressions. Pulpdent Cavity Liner can also be applied on the pulpal floor before applying etching gels, under amalgam, or under conventional restorative materials.

* Bacteriostatic; bactericidal
* Increases dentin density by 25% in 15 days
* pH > 12
* Does not interfere with seating
* Neutralizes irritants in etchants, adhesives, restoratives
* Reduces post-operative sensitivity
* Protects pulp

Quantity: 15cc Bottle

### HYDROX - BOSWORTH

**HYDROX - BOSWORTH / Keystone**

Hydrox radiopaque calcium hydroxide paste is a rigid, self-setting cavity liner and pulp capping agent. Hydrox eliminates all chemical and thermal sensitivity by sealing dentinal tubules and protecting the pulp. Hydrox serves as a protective barrier that insulates the dentin and pulp from acid-containing cements and restorative materials. Works well under glass ionomers and will not affect amalgam or the polymerization of composites. The superior flowability of Hydrox permits uniform coverage and controlled placement into preparations.

**Tips:** Hydrox can be used as a temporary cement. Hydrox’s high pH level acts to inhibit bacterial growth at the cavity wall. This property is particularly important for the treatment of teeth with complicated crown fractures, open apices, or root perforations.

# 108-000124

Miracle Mix is a combination of glass ionomer and spherical amalgam alloy powder to form a metal reinforced crown and core build-up material
Miracle Mix offers the proven formula of glass ionomer cement with 100% fine silver alloy powder.

Features:
- 50 Refill Miracle Mix Capsules

Advantages:
- Strong Direct Bond
- Simple Technique
- High Fluoride Release
- Won’t Stain or Discolor Surrounding Teeth
- Easily Distinguishable from Tooth Structure
- Shrinks and Expands like Tooth Structure
- No-Mess Capsules or Powder-Liquid

GC - 108-000239 Miracle Mix Comb Kit Pwd & Liq

Features:
- Miracle Mix Metal-Reinforced Crown & Core Build-Up Restorative - Build Kit.
- Miracle Mix offers the formula of glass ionomer cement with 100% fine silver alloy powder.
- Silver Alloy / Glass Ionomer Restorative Cement

Contains:
- 15gm powder
- 10gm liquid
- 17gm alloy powder

Advantages:
- Strong direct bond that will not chip when brimmed or cut
- Simple technique that only takes four minutes set to finish
- High fluoride release that reduces secondary decay
- Won’t stain or discolor surrounding teeth
- Easily distinguishable from tooth structure
- Shrinks and expands like tooth structure

US$ 130.13
RIVA SILVER - SDI

Features:
* Mercury free, fluoride releasing, silver restorative
* Proprietary ionglass\textsuperscript{TM} technology: Riva Silver utilises SDI’s proprietary ionglass\textsuperscript{TM} filler developed by our glass technologists. ionglass\textsuperscript{TM} is a radiopaque, high ion releasing, reactive glass used in SDI’s range of dental cements. Riva Silver releases substantially higher fluoride to assist with remineralisation of the natural dentition.
* Light colour: The light grey colour of Riva Silver requires minimal masking when used under aesthetic restorations.
* Easy handling: Riva Silver’s condensable nature allows the operator to quickly and easily place the restoration. Riva Silver can be packed using an amalgam condenser.
* Perfect for non-compliant patients: Riva Silver is the ideal restorative in situations where patient compliance and moisture control are difficult. Riva Silver is extremely easy and quick to use.
* Great for core buildups: Riva Silver is an excellent material for core buildups. Its high early compressive and bond strength properties ensure favourable core buildup conditions.

Cements and Liners

Dual Luting Resin Cem.

COMPOSITE LUTING CEMENT SYRINGE KIT - PRO-LINE

Includes
* 1x 10g syringe
* 3x Mixing Tip
* 3x Intra Oral Tips

Auto-mix system, dual cure, filled multipurpose permanent cement, for use in final cementations of implant prosthesis, crown and bridges, inlays, onlays, veneers, cementation of post & pins and periodontal splinting.

Features and Benefits:
* Quick Cementation
**Automix Handheld Syringe**
* Convenient, economical and especially used for multi-operatory practices.
* No mixing, no air bubbles, no wasted material due to over mixing.
* Ensures, predictable, accurate, consistent and homogenous mix every time.
* Minimal heat generated (Protects pulps)
* Radiopaque (Easy identification on x-ray)
* Low Film thickness, provides easy placement of crowns & bridges
* Fluoride Release, reduces secondary caries.

**Physical Properties:**
* Working time: 2 minutes.
* Setting time: 5 minutes.
* Compressive strength: 266 MPa
* Flexural strength: 133 MPa

**EMBRACE RESIN CEMENT - PULPDENT**

**Features:**
Dual Cure - Fluoride Releasing - Radiopaque
Contains No Bisphenol A, No BIS-GMA, No BPA Derivatives
For cementation of PFM, gold, CEREC?* and reinforced ceramics for crown and bridge; Inlays, gold, metal, titanium and fiber posts

Embrace Resin Cement is the first self-adhesive resin cement that bonds to the slightly moist tooth. Embrace is a moisture-friendly, ionic resin, not a glass ionomer, and is fully compatible with the moist oral environment. Embrace forms chemical bonds to dentin and enamel, precious and non-precious metals, ceramics, composites, and fiber posts. Bonding agents are not required; however, they can be used if desired. It is not necessary to etch dentin, but etching uncut enamel surfaces is indicated.

Embrace Resin Cement is non-irritating, self-adhesive, contains no solvents, requires no etching or drying of dentin, and provides an exceptional seal against microleakage. These features eliminate the major causes of sensitivity.

* Self-Adhesive - Moisture Tolerant
* Bonds in a slightly moist field
* Self-adhesive properties
* Self-etching to dentin
* Eliminates microleakage

GC - 400708 FujiCem 2 Automix Paste 2pk

GC - FujiCem 2 Automix Paste Pak 2/pk. - #004714
GC Euro - FujiCem 2 Automix Paste Pak 2/pk
Resin Luting Cement
# 400708  Mfg #004714

Features:
GC FujiCEM 2 is a second-generation, resin modified glass ionomer luting cement. Following ten years of clinical success with GC FujiCEM, this product is powered by F2 Flex Fuse Technology, which incorporates new high-elastic crosslinking monomers with a modified filler-surface treatment that increases strength properties. The F2 Flex Fuse Technology helps with improving indirect restorations with increased strength, high fluoride release, low film thickness and excellent marginal integrity. Indicated for a broad array of indirect restorations including all types of metal-, resin-, alumina- and zirconia-based inlays, onlays, crowns and bridges, GC FujiCEM 2 delivers superior bond strength which allows extra time for completing more restorations. The automix paste pak dispensing system ensures a consistent mix every time, allowing you to place every restoration with the confidence that it will last. Fast, easy to use and stronger than ever, the new GC FujiCEM 2 from GC America is the ideal luting cement for all indirect restorations.

Specifications:
* Packaging: 2/PK
* Easy to use
* Delivers superior bond strength
* Ensures long-lasting restorations
* An ideal luting cement for all indirect restorations
* Second-generation, resin-modified glass ionomer luting cement
* Fast application; allows extra time for completing more restorations
* Can be used with the automix paste
SHOFU - 113823 ML Metal Primer 5ml

Features:
SHOFU has developed the M.L. Primer as a secure and durable adhesive system for bonding veneering composite and all common dental alloys.

Based on adhesive monomers M.L. Primer reliably bonds without requiring extensive processing and is resistant to moisture and thermal strains.

It is easy to handle and suitable for nearly all indications, as it can be used intra and extra orally.

Indication:
Production and repair of resin veneered restorations repair of PFM restorations production and repair of chrome cobalt dentures or metal attachments bonding and repairing of metal restorations (inlays, onlays, crowns and bridges), metal splints, metal posts and cores with dental adhesive resin or bonding- / filling material

Benefits:
* Intra and extra oral use
* Easy handling
* Rapid processing
* Secure composite / alloy bond on all common dental alloys
* Thin layer
* No additional equipment is required
* No grey shadows in the bonding area

US DENTAL DEPOT Inc is an Authorized SHOFU Dealer in the US.

MONOCEM - SHOFU

For All ceramics All metals and All types of posts
NOT recommended only for porcelain veneers MonoCem is dual cure Unlimited working time 100% polymerization.
The MonoCem can also replace the Celibra Cement Automix syringe delivery system.

* Can Replace Celibra Cement
* Self-adhesive resin cement
* Self-etch primer.
* Hydrophilic
* Dual Cure
* New and improved
* 3 minute setting time
**Bonds to all substrates with high retention values**
* Eliminates sensitivity and has high fluoride release
* Moisture tolerant and two second tack cure for easy clean-up
* 100% polymerization
* Very low film thickness (12?m)

CLEAR AND BLEACH WHITE AVAILABLE

**US DENTAL DEPOT Inc is an Authorized SHOFU Dealer in the US.**

**KURARAY - 100537 Panavia F 2.0 Intro Kit Light**

Panavia F 2.0 Intro Kit Light Kurary America Inc (483KA)

**Description:**
Panavia F 2.0 is a self-etching, self-adhesive, dual-cure, fluoride releasing resin cement that can be cured with any Halogen, Plasma ARC or LED light. Panavia F 2.0 Paste contains 2 photo initiators, providing a wider curing band with so you can use any of the currently available curing lights. Panavia F 2.0, as with all Panavia resin cements, contains the same, proprietary MDP adhesive monomer that has been proven with over 20 years of clinical use. In addition to the legendary bond strength with metal restorative materials, this proprietary monomer also provides the strongest bond to any of the metallic-oxide ceramic restoration (Procera, In-Ceram, Cercon, Lava, Wolceram etc.)

**Features & Benefits:**
- Ideal for any procedure with any curing light
- NEW self-etching primer
- Legendary desensitizing
- Strongest bond to metal-oxide ceramics
- MDP self-adhesive monomer

**Contains:**
- 1 PANAVIA F2.0 A Paste 1ml
- 1 PANAVIA F2.0 B paste 1ml
- 1 ED Primer II Liquid A 1ml
- 1 ED Primer II Liquid B 1ml
- 1 Oxyguard II 1.5ml
- 1 Mixing pad

**US$ 182.70**
**KURARAY - 402378 Panavia F 2.0 Intro Kit Opaque**

PANAVIA F 2.0: INTRO KIT - OPAQUE - Mfg. Part #: 482KA

Panavia F 2.0 is a self-etching, dual-cure, fluoride-releasing cement for use with metal, ceramics and metal-oxides (Zirconia) restorations.

**INDICATIONS**
- Cementations of: Metal crowns, bridges, inlays and onlays
- Porcelain crowns, inlays, onlays and veneers Ceramic oxide crowns, bridges, inlays and onlays Composite resin crowns, inlays and onlays

**Adhesion bridges**
- Endodontic cores and prefabricated posts

**Amalgam bonding**
- Properties Ideal for any procedure with any curing light
- New self-etching primer
- Legendary desensitizing
- Strongest bond to metal-oxide ceramics
- MDP self-adhesive monomer

**Contains:**
- 1 PANAVIA F2.0 A Paste 1ml
- 1 PANAVIA F2.0 B paste 1ml
- 1 ED Primer II Liquid A 1ml
- 1 ED Primer II Liquid B 1ml
- 1 Oxyguard II 1.5ml
- 1 Mixing pad
- 1 Mixing spatula
- 1 Brush holder
- 1 Disposable brush tips (50 pcs.)
- 1 Mixing dish
- 1 Light-blocking plate
- 1 Disposable nozzles (5 pcs.)

**US$ 182.70**

**KURARAY - 142-7214553 Panavia F 2.0 Standard Kit TC**

KURARAY Panavia F2.0 Standard Kit Tooth Color Contains: 1 x 2.3 ml (Paste A), 1 x 2.3 ml (Paste B), 1 x 4 ml ED Primer II Liquid A, 1 x 4ml ED Primer II Liquid B, 1 x 6ml Oxyguard II, 1 x 4ml Clearfil Ceramic Primer, 1 x 5ml Alloy Primer, 1 Mixing pad, 1 Mixing spatula, 1 Brush holder, 4 Disposable brush tips (50 pcs.), 1 Mixing dish, 1 Light-blocking plate and 4 Disposable nozzles (5 pcs.) Mfg. Part #:501KA P#M83-2078

**Panavia F 2.0 Standard Kit TC #**

**US$ 385.00**

---

**KURARAY Panavia F 2.0 Standard Kit TC #**

Panavia F 2.0 is an universal resin cement which shows high bond strength to tooth structures, metals and ceramics. PANAVIA F 2.0 has been regarded as a guarantee for permanent adhesive technique in the areas of all-ceramics and metal restorations especially for high-quality and difficult restorations. It is recommended by leading universities as a premium product. The self-etching cement system prevents postoperative sensitivity and provides consistently good results. The anaerobic curing properties which do not begin until direct contact has been made with the restoration (no more contact with oxygen) and the flexible consistency make PANAVIA F 2.0 a popular aid in daily practice. Even after releasing fluoride, the cement maintains its high
mechanical strength due to the special surface coating technology of sodium fluoride.

**CONTENT:**

- 1 PANAVIA F 2.0 A PASTE: 5.0 g (2.3 ml)
- 1 PANAVIA F 2.0 B PASTE: 4.6 g (2.3 ml)
- 1 ED PRIMER II Liquid A (4 ml)
- 1 ED PRIMER II Liquid B (4 ml)
- 1 ALLOY PRIMER (1 ml)
- 1 OXYGUARD II (6 ml)
- Accessories: 1 mixing pad, 1 spatula, 1 mixing dish, 1 brush tip handle, 200 disposable brush tips, 20 disposable nozzles, 1 light blocking plate

---

**KURARAY - 151-PANAVIA-EX Panavia-21 Ex Kit TC tooth color**

Panavia-21 Ex Paste 2 x 4 ML - KRY (Dental Adhesive Kit Kurary #455KA) [[Cemento Anaerobico Kit dual ]]PANAVIA 21 Ex Refill TC tooth color Mfg# 455KA

Panavia 21 is a dental adhesive cement that directly bonds to cut enamel, dentin, composite, porcelain, base, semi-precious and precious metals. ED Primer ensures an effective mild one-step conditioning of cut enamel and dentin, so that there is no need for acid etching or rinsing. There is no post-operative sensitivity. Its high strength paste/paste formulation provides a consistent mix with convenient working times and setting times. The practical dispenser gives additional convenience in mixing the pastes at the correct ratio. Panavia 21 is available in three shades: white (EX), tooth color (TC), and opaque (OP).

- High bond strength to cut enamel, dentin, metal, silanated porcelain and cured composite
- ED Primer for effective one-step conditioning of cut enamel and dentin without having to rinse
- Easy handling
- Convenient dispenser measures precise amounts of paste for consistent results
- Anaerobic setting properties provide extended working time and trouble-free cleaning
- Low film thickness for accurate setting
- Radiopaque and insoluble
- Great for cementing metals, porcelain, composites, posts, adhesion bridges/splints, and bonded amalgam restorations

US$ 231.00
ESPE - 400645 RelyX Luting Plus Clicke Refill 2pk

ESPE - RelyX Luting Plus Clicker Refill 2/bx. #3525 A  2 x 11g RelyXTM Luting 2 Cement in ClickerTM Dispensers

Features:
RelyX Luting Plus Clicker is a paste-paste delivery system for resin-modified glass ionomer formula designed to make every dentist's job easier. It also helps with the consistency of mix ratios. Easy to use and easy to clean. Low post-operative sensitivity and sustained fluoride release.

* Includes 2-11g RelyX Luting Plus Cement in Clicker dispenser per kit
* Ideal for PFMs, zirconia, metal and pediatric crowns
* Convenient paste-paste delivery system

Quantity: 2/Box

US$ 155.25

ESPE - 400646 RelyX U200 AutoMix A2 Refill

ESPE - RelyX U200 AutoMix A2 Refill - 3M ESPE - 3/19 - #56895

Features:
RelyX U200 - the latest generation of the world's most clinically proven self-adhesive resin cement - is available in the Clicker Dispenser and in an easy-to-use automix syringe.

* Comfortable handling
* Optimal consistency for dispensing and seating
* Flexible dosing
* Time-saving
* A great choice of tips allows always easy application of paste directly into the cavity
* Low risk of air bubbles and voids
* Clicker Dispenser
* Delivers pre-measured doses for consistent and economical mixing
* Choice of dispensed amount 11 g dispensed in 80 clicks (approx. 40 applications)
* Improved mixing through new technology
* Simple and time-saving one-step solution.
* Only a few working steps required
* No pre-treatment such as etching, priming or bonding necessary
* High-performing self-adhesive resin cement.

US$ 134.93
Indications:
* All-ceramic, composite, or metal inlays, onlays, crowns and bridges
* Posts and screws
* 2- or 3-unit Maryland bridges
* 3-unit inlay/onlay bridges
* All-ceramic, composite, or metal restorations to implant abutments

# 400647 - Mfg # 56878

Features:
RelyX Unicem 2 Self-Adhesive Resin Cement is the most clinically proven self-adhesive resin cement, trusted by dentists worldwide. It has virtually no post-operative sensitivity. Selective etching is required to increase surface area for bonding.

Shade: A2

Quantity: 11 gr

**RESICEM - SHOFU**

**METAL ZIRCONIA PRIMER- BONDING TO ZIRCONIA**

ResiCem is an adhesive cementation system with outstanding physical properties for all types of framework and restorative materials.

As the percentage of all-ceramic restorations continues to grow and the demand for aesthetic dentistry increases, Shofu introduces ResiCem. Modern framework materials, such as zirconia and alumina, require modified procedures, as well as appropriate instruments and tools, to work on and integrate all-ceramic restorations.

Proper adhesive cementation is critical to the long-term clinical success of these highly aesthetic restorations. ResiCem is an adhesive cementation system with outstanding physical properties for all types of framework and restorative materials.

Benefits:
* Excellent adhesion and aesthetics
* Customize to be universal for all materials
* Self-conditioning
* High fluoride release
* Very low film thickness (9m)

US DENTAL DEPOT Inc is an Authorized SHOFU Dealer in the US.

RelyX Unicem 2 Automix A2 cement formula eliminates the need to

**US$ 126.00**
pre-treat the tooth reducing the potential for errors in etching, priming and bonding. Perfectly matched endo tips allow precise application of the cement, directly into the root canal from bottom to top, greatly reducing the risk of air bubbles & voids. Convenient delivery systems Virtually no post-operative sensitivity Easy removal of excess Strong and moisture-tolerant.

SET & SET PP- SDI
SET & SET PP- SDI

SeT is a self-etching, self-adhesive, resin cement designed for final cementation of metal, resin and all-ceramic and ceramic-based restoratives. SeT is a self etching, self adhesive, resin cement, designed for final cementation of metal, resin, all ceramic and ceramic based restoratives. seT chemically bonds to tooth structure and all types of core material. seT is available in capsules and a paste/paste automix syringe system (seT PP). Fast and easy SeT is an all in one luting cement. It etches, bonds and fills with just the one component. Simply apply seT and seat your restoration. seT produces a low film thickness and fluidity to seat cemented restorations.

ESPE - 116603 Unicem 2 Automix Trans Refil

ESPE - Relyx - Unicem 2 Automix Refill  Translucent U - ( U200 )
3M-56897 [ 503-6413 ]ESPE - Relyx Unicem 2 Automix Refill
Translucent U200
Dual Luting Resin Cem.
# 116603 - Mfg # 3M-56897

US$ 126.00
Feature

* For simplicity powered by performance, rely on this enhanced, next-generation formula in an easy-to-use delivery system.

* RelyX Unicem 2 Automix Self-Adhesive Resin Cement represents the next generation of self-adhesive resin cements.

* This newcomer is based on the same chemistry as RelyX Unicem Self-Adhesive Resin Cement, the most clinically proven self-adhesive resin cement worldwide. This year it received the "2010 Top Long-term Performer" award by THE DENTAL ADVISOR*, which is only one of many awards the cement has won.

* The improved formulation remains closely related to its predecessor, while offering even more convenience due to its automix delivery system.

* The syringe dispenses the ready-mixed cement using mixing tips offered in three different sizes: Mixing tips for standard applications, endo tips ensuring a safe and void-free procedure when working in the root canal and for the cementation of inlays and onlays, special intra-oral tips are available as well.

Descriptions:

* Convenient dispensing.

* Time-saving - no etching, priming or bonding.

* Virtually no post-operative sensitivity.

* Easy removal of excess.

* Optimal consistency.

* Strong and moisture-tolerant.

Except for 2- or 3-unit Maryland bridges and 3-unit inlay/onlay bridges. Selective etching is required to increase surface area for bonding.

Permanent cementation of:

* All-ceramic, composite or metal inlays, onlays, crowns and bridges.

* Post and screws

* 3 - unit inlay/onlay bridges.

* All-ceramic, composite or metal restorations to implant abutments.

* 2 -or 3-unit Maryland bridges.
Kit Included:
* 1 syringe 8.5 g Opaque color A3
* 15 mixing tips (Regular)
* 5 Mixing Tips (Wide)
* 5 Endo Tips.

**IVOCLAR - 76-628319 Variolink II System Kit Cement**

IVOCLAR- Variolink II Esthetic Cementation System Kit Iv # 628319 - Dual cement with Excite DCS -IVOCLAR- Variolink II Esthetic Cementation System Kit  # 628319

Variolink II is a resin composite luting cement for cementation of indirect all-ceramic, Ceromer, and resin composite restorations. It is especially recommended for the insertion of IPS Empress restorations. Variolink II is said to be dual cured.

Variolink II, the successor to Variolink, is purported to exhibit improved shade range, fluoride release, polishability, and decreased sensitivity to ambient light. Variolink II is available in six shades, three degrees of translucency, and three consistencies (low, high, and ultra-high viscosity).

The pastes are packaged in Luer-Lock Push Syringes, which gives users better control when dispensing the materials.

Includes:
- 6 - 2.5gram Base Syringes (Bleach XL, White, Transparent, Yellow, Brown, Opaque White)
- 4 - 2.5gram Catalyst Syringes (HV Transparent, HV Yellow, LV Transparent, LV Yellow)
- 12 - 0.1 gram unit dose Excite DSC
- 2gr syringe Total Etch
- 5gr Monobond Plue
- 2.5 gr Liquid Strip

Premier - 400791 Implant Cement Std Pack

Premier - Implant Cement Standard Pack - #3001450

Cement Standard Pack

# 400791  Mfg # 3001450

Features:
Premier Implant Cement is a noneugenol, temporary resin-based cement for implant retained restorations and provisionals when retention is as important as retrievability. Designed for implants, perfect for temporaries.
High retention eliminates patient recalls for re-cementation
Low solubility with good marginal seal
Initial gel-phase in 2.5 minutes for easy removal of excess cement
Rigid final set for excellent marginal seal and firm retention
Automix syringe saves time
Aesthetic gingival shading for natural appearance
Virtually no taste or odor for increased patient comfort

Specifications:
* Contains: 1 (5 ml) automix dual-barrel syringe, 10 mixing tips and 1 mixing pad
* Package Quantity: 1/Pkg

US$ 67.14

ZERO-G BIO-IMPLANT CEMENT - TAUB

ZERO-G BIO-IMPLANT CEMENT - TAUB

ZERO-G is a dual-cure implant cement and is recommended for intermediate to long-term cementation of implant-retained restorations. During recall the restoration can be easily removed.
This product provides excellent radio-opacity for good visualization after cementation to document complete clean-up, as well as diagnostic examination upon follow-up.
ZERO-G implant cement is retentive, and easily allows removal of excess cement, where it may occur. Unique color has great contrast to gingival tissue, creating easy visualization. Simple, easy clean-up.

Light-cure: 20 seconds - allows complete margin curing.

Self-cure: Working time: 1 min 45 sec. Set time: 2 min 30 sec.

This cement can also be used for traditional crown and bridge restorations when following pocelain or Zirconia bonding procedures.

ESPE - 108-7510 ESPE VitreBond Intro Kit

Vitrebond Light Cure Glass Ionomer Liner/Base Intro Kit #108-7510  7510 -
Intro kit contains: 1 [9 g] powder- 1 [5.5 ml] liquid- spoon and 2 mixing pads -
A light-cure glass ionomer liner/base that combines light-cure convenience
with true glass ionomer fluoride release and bond strength
ESPE - Vitrebond
Light Cure Glass Ionomer Liner/Base Intro Kit
Ionomer Base Cements
# 108-7510 - Mfg # 7571

Features:
The Vitrebond convenient paste-liquid formula in our unique Clicker
Dispenser offers the protection of a conventional glass ionomer liner
without the mess of measuring.

Advantages:
Faster, easier dispensing and the right mix every time.
Conventional paste-liquid formula offers the protection of a
conventional glass ionomer liner without the mess of measuring.
Award-winning Clicker dispenser assures a consistent mix.
Helps protect against post-op sensitivity: offers a strong bond to dentin,
sealing the tooth structure to protect against microleakage.
Low microleakage comparable to original Vitrebond Liner/Base.
Fluoride release of a true glass ionomer.
Excellent handling characteristics for easy placement.
Cures in 20 seconds - a faster cure time than powder-liquid formulas.
Delivers excellent adhesion with any dental adhesive system.
Radiopaque.
No additional hardware required

Contains:
* 1 (9 g) powder-
* 1 (5.5 ml) liquid- spoon
* 2 mixing pads

Indications:
Liner/Base under direct and indirect restorations, including composite,
amalgam, ceramic and metal restorations.

GLASIONOMER BASE CEMENT - SHOFU

Advantage!!!
A high compressive strength base cement formulated for dentin replacement
Recommended as a supportive, protective base under stress-bearing amalgam,
composite and porcelain restorations.
Compressive strength (147 MPa) High fluoride release reduces the occurrence of
secondary caries Radiopaque Low solubility Easy mixing and handling
Biocompatible and chemically bonds to dentin and enamel Pediatric temporary cusp replacement.

US DENTAL DEPOT Inc is an Authorized SHOFU Dealer in the US.

**ESPE - 400614 Vitrebond LC Ionom Base**

ESPE - Vitrebond Light Cure Glass Ionomer Liner/Base #7510 introductory pkg

**Features:**
Vitrebond is a light-cured, resin-modified glass ionomer (RMGI) liner/base material. It is recommended for use as a liner or base under composite, amalgam, metal and ceramic restorations. It is not indicated for direct pulp capping.
Excellent bond strength with a hard set in seconds
Antimicrobial action and fluoride release
Excellent performance under both direct and indirect restorations

**Specifications:**
* Contains: 1 (9 g) powder, 1 (5.5 ml) liquid, 1 spoon and 2 mixing pads
* Package Quantity: 1/Pkg

**ESPE - 115594 Vitrebond Plus Clicker 2pk**

Vitrebond Plus Clicker 2pk - Light Cure Glass Ionomer Liner/Base # 7572

**Features:**
The Vitrebond convenient paste-liquid formula in our unique Clicker

**Catalog 6510 - Oct/09/2018**
Dispenser offers the protection of a conventional glass ionomer liner without the mess of measuring.

Advantages:
Faster, easier dispensing and the right mix every time.
Conventional paste-liquid formula offers the protection of a conventional glass ionomer liner without the mess of measuring.
Award-winning Clicker dispenser assures a consistent mix.
Helps protect against post-op sensitivity: offers a strong bond to dentin, sealing the tooth structure to protect against microleakage.
Low microleakage comparable to original Vitrebond Liner/Base.
Fluoride release of a true glass ionomer.
Excellent handling characteristics for easy placement.
Cures in 20 seconds - a faster cure time than powder-liquid formulas.
Delivers excellent adhesion with any dental adhesive system.
Radiopaque.
No additional hardware required

Indications:
Liner/Base under direct and indirect restorations, including composite, amalgam, ceramic and metal restorations.

GC - 108-001887 Fuji Lining LC Paste Refill Pk

GC Fuji LINING LC Paste Refill Pak (mFR#001887) Contains: One 7.0g (4.7ml) Paste Pak Cartridge of Fuji LINING LC [P G 05-02-62] GC Fuji LINING LC Paste Refill Pak
Radiopaque Lining Material: Paste Refill Pak
# 108-001887 Mfr # 1887

GC Fuji LINING LC Paste Pak is the first light-cured, glass ionomer lining material available in a paste-paste formula that is used as a liner or a base under composite resin or amalgam restorations. It has a high-compressive strength, minimal polymerization shrinkage and extremely low solubility.

DETAILS:

Sensitivity
Minimal

Includes
One 7.0g (4.7mL) Paste Pak Cartridge of Fuji LINING LC

Manufacturer
GC America Inc.

Manufacturer Code
001887

Flouride Release
Long-Term

Freeze Restricted
N/A

GC Fuji LINING LC Paste Pak minimizes sensitivity and provides long-term fluoride release. It bonds well to the tooth structure and composite, creating the ideal dentin substitute. This product also flexes and absorbs the stresses caused by the polymerization shrinkage, thermal expansion, and contraction of composite materials.

**GC-FUJI - 108-003208 Fuji Plus Automix Pst Pk Ref 2**

GC-FujiCem Automix Pst Pk Refill 2/Pkg (Mfr#003208) Resin Modified Glass
Ionomer Luting Cement  [orthodontic band cement] GC - FujiCem Automix
Pst Pk Refill 2/Pkg
Ionomer Luting Cements
# 108-003208 - Mfg # 003208

Features:
Now the choice is yours: automatic or by hand.
FujiCEM Automix: all the brilliant benefits of the exclusive FujiCEM Paste Pak dispensing system in a brand new, ultra-convenient automix delivery system.

Advantages!
Extremely thin seating film
Adhesive and compressive strength guaranteed
Clinically insoluble ionic bonding
Sustained release of fluoride
Biocompatible
Radiopaque

Indications:
Given its simplicity and timesaving benefits, GC FujiCEM is the ideal cement for your luting procedures with metal-based restorations and simple ceramic inlays.

The recipe for its success?
With its own unique dispenser, FujiCEM creates a complete luting 'system' that not only simplifies the luting process, but also saves you time and helps ensure a perfect result.
Looking for added flexibility and ease of use? FujiCEM proudly presents the new Automix option. With FujiCEM Automix, you transfer an even mix directly into the restoration. It’s faster and easier than mixing by hand - without voids or risk of post-op sensitivity.
Developed by GC, a leading manufacturer of high quality, technically advanced luting cements, FujiCEM has built its reputation on successful clinical results during its seven years on the market.
FUJI PLUS CAPS - GC
FUJI PLUS CAPS - GC
Ionomer-Luting-Cements-Type-1

Features:
GC Fuji PLUS is a resin-reinforced, glass ionomer luting cement designed for final cementation of metal, porcelain-fused-to-metal, metal-free crowns, bridges, inlays and onlays.
The GC Fuji PLUS bonds chemically and mechanically to tooth structure and all types of core material.
The GC Fuji PLUS simple placement technique produces significantly higher bond strengths than conventional glass ionomer cements while maintaining the favorable characteristics of glass ionomers—fluoride release, low coefficient of thermal expansion, and biocompatibility to tooth structure and soft tissues.
For indirect metal-free restoration that recommend a resin-reinforced / resin-modified glass ionomer for final cementation - cementable reinforced all ceramic crowns like PROCERA or cementable composite resin restoration like GRADIA.
The use of optional Fuji PLUS Conditioner prepares the bonding surface, which dramatically increases the bond strength and reduces the chance of pulpal sensitivity.
A 20 second application of Fuji PLUS Conditioner removes smear layer with a mild citric acid etchant and seals dentinal tubules with its ferric chloride component.

GC - 111137 Fujicem Automix 2 x Pack Ref

GC - Fuji Cem Automix Compatible Refill - 2 x 13.3 gr Paste Pack - Ionomer for cementation ( Mfg # 004599 / 004603 Comparable with Mfg # 002589 )
- [ 207-1025 ] Metal PFMins and resin crowns- bridges- inlays and onlays and porcelain inlays.- [ # 250-003141 ] [ orthodontic band cement ]

Product Information:
- * 2 Cartridge pack ( no mixing tips )
- * Resin Modified Glass Ionomer Cement Paste Pak
- GC FujiCEM 2 is a second-generation, Self-cure resin modified glass ionomer luting cement. Following ten years of clinical success with GC FujiCEM, this product is powered by F2 Flex Fuse Technology, which incorporates new high-elastic crosslinking monomers with a modified filler-surface treatment that increases strength properties.

System
Type
All applications

Delivery System
Automix Past Pak cartridge

CATALOG 6510 - oct/09/2018
The GC FujiCEM 2 is indicated for a broad array of indirect restorations including all types of metal-, rein-, alumina- and zirconia-based inlays, onlays, crowns and bridges.

GC FujiCEM 2 delivers superior bond strength which allows extra time for completing more restorations.

The GC FujiCEM 2 automix paste pak dispensing system ensures a consistent mix every time, allowing you to place every restoration with the confidence that it will last. Fast, easy to use and stronger than ever, the new GC FujiCEM 2 from GC America is the ideal luting cement for all direct restorations.

**GC - 028-431011 GC FUJI-1 1:1 Pwd & Liq**  
US$ 87.68

GC FUJI-1 1.1 Ionomer Luting Cement  Powder 35gr  Liquid 25ml  
E250-002503  [juji-one] GC-FUJI - Glass Ionomer Luting Cement
Ionon Ceme
#028-431011  Mfg #002503

Features
* Intrinsic adhesion to tooth structure to eliminate complex and moisture sensitive bonding procedures
* Minimal film thickness for easy seating and improved fit
* Very low solubility to maintain marginal seal
* Radiopacity for facilitated diagnosis
* Easy mixing and handling like a conventional cement with similar mechanical properties to resin.
* Self-cure
* Color: light yellow
Kit includes:35 Gm. Powder, 25 Gm. Liquid, spatula & mixing pad.
GLASIONOMER CX - SHOFU

**Advantage**
An enhanced Glass Ionomer luting cement with prolonged working time
Indicated for cementing crowns, inlays, long span bridges and orthodontic appliances.

Prolonged working time with no change in viscosity followed by a Snap-Set
Low film thickness (20 μm) with high compressive strength (177 MPa)
Bonds to both dentin and enamel to provide an excellent marginal seal to overcome
post-operative sensitivity
High fluoride release
Radiopaque
Easy mixing, handling and resistant to water contamination at the initial stage.

US DENTAL DEPOT Inc is an Authorized SHOFU Dealer in the US.

PULPDENT - GlassLute Luting Cement #ILU Kit: 30g powder- 15ml liquid-scoop- mixing pad - Refill - # ILU

Features:
Self-Cure - Fluoride Releasing
Glasslute is specifically formulated as the ideal ultra-thin glass ionomer crown and bridge luting cement. Its strong bond to dentin and fluoride ion release assure the long lasting bonding integrity required for luting cements.

* For cementing crowns, bridges & posts.
* High adhesion to tooth & restoration.
* High diametric tension to withstand masticatory forces.
* Universal tooth shade.
* Ultra-thin film thickness: 15 microns.

All Pulpdent Glass Ionomer Cements Offer These Outstanding Benefits:
### Ionomer Luting Cements Type 1

**Cements and Liners**

#### Features:
- Fluoride ion release
- Low coefficient of thermal expansion: 9 ppm
- Excellent bond strength to dentin and enamel
- Acid-etchable
- Very high compressive and diametric tensile strengths
- Controlled setting to prevent rapid dehydration which has been shown to cause pulpal sensitivity

Contains: GlassLute Kit: 30g powder, 15 mL liquid, mixing pad, scoop

### ESPE - 108-37200 Ketac Cem Radiop Intro Pack

**Features:**

- Fluoride ion release
- Low coefficient of thermal expansion: 9 ppm
- Excellent bond strength to dentin and enamel
- Acid-etchable
- Very high compressive and diametric tensile strengths
- Controlled setting to prevent rapid dehydration which has been shown to cause pulpal sensitivity

**Contains:**
- GlassLute Kit: 30g powder, 15 mL liquid, mixing pad, scoop

**Price:** US$ 68.00

### ESPE - 400636 KetacCem Liquid 12ml/bt.

**Features:**

- Fluoride ion release
- Low coefficient of thermal expansion: 9 ppm
- Excellent bond strength to dentin and enamel
- Acid-etchable
- Very high compressive and diametric tensile strengths
- Controlled setting to prevent rapid dehydration which has been shown to cause pulpal sensitivity

**Contains:**
- GlassLute Kit: 30g powder, 15 mL liquid, mixing pad, scoop

**Price:** US$ 7.50

### PRIME DENT - 116007 Prime Dent Glass Ion Cem Kit

**Features:**

- Fluoride ion release
- Low coefficient of thermal expansion: 9 ppm
- Excellent bond strength to dentin and enamel
- Acid-etchable
- Very high compressive and diametric tensile strengths
- Controlled setting to prevent rapid dehydration which has been shown to cause pulpal sensitivity

**Contains:**
- 18g Powder
- 17.5ml Liquid

**Price:** US$ 15.07
Cements and Liners
Ionomer Luting Cements Type 1

PULPDENT - 113719 ResiLute Clear 4+4gr Kit
PULPDENT - ResiLute Clear Shade- 4 gm base- 4 gm catalyst- OxOut Oxygen Inhibiting Gel # RES-C

Features:
Dual Cure - Fluoride Release - Radiopaque
Exceptional Strength
ResiLute is an exceptionally strong dual cure resin cement for permanent cementation of all metal castings, of indirect ceramic and composite restorations such as laminate veneers, inlays, onlays and crowns, and for bonded amalgam restorations. OxOut Oxygen Inhibiting Gel can be placed on the margin to eliminate the air inhibited layer.

* 68.2% filled
* Nominal particle size: 0.7 microns
* Low Film thickness: 15 microns
* Universal and clearshades
* Oxygen inhibition provides long working time
* Light cures on demand orself-cures in 6 minutes

Contains: Kit: Clear Shade, 4 gm base, 4 gm catalyst, 1.2 mL OxOut

PULPDENT - 113720 ResiLute Universa 4+4gr Kit
PULPDENT - ResiLute Universal Shade- 4 gm base- 4 gm catalyst- OxOut Oxygen Inhibiting Gel # RES-U

Features:
Riva Luting is a conventional, self curing, glass ionomer luting cement designed for final cementation of metal based restorations. It chemically bonds to metal substrates and the tooth.

* Proprietary ionglassTM filler technology: Riva Luting utilises SDI?s proprietary ionglass? filler developed by our glass technologists. ionglass? is a radiopaque, high ion releasing, reactive glass used in SDI?s range of dental cements. Riva Luting releases substantially higher fluoride to assist with remineralization of the natural dentition.
* Proven antimicrobial effect: Compared to other materials such as fluoride releasing resin cements, Riva Luting has proven antimicrobial activity against three cariogenic
Bacteria: Streptococcus mutans, Streptococcus sobrinus and Lactobacillus(2).

* One simple colour: Riva Luting is available in a universal light yellow shade.

ESPE - 115593 Ketac-Fil Plus Aplicap Asst
Ketac-Fil Plus Aplicap - Glass Ionomer Restorative # 55010 #NAME?
ESPE - Ketac-Fil Plus Aplicap
Ionomer Restorative Type 2
# 115593 - Mfg # 55010
US$ 154.35
Features:
This radiopaque conventional glass ionomer filling material in the unique Aplicap delivery system offers high fluoride release and helps you achieve virtually invisible anterior restorations. Refill includes 50 capsules in assorted shades: A1, A2, A3, A3.5 and A4.
* Provides molecular bond to enamel and dentin to guarantee a tight marginal seal.
* Offers high fluoride release
* Radiopaque.
* Consistent, easy and unit-dose dispensing with high visibility during placement.
* Minimal preparation.
* Available in eight esthetic shades to better match existing tooth structure.

Indications:
* Class III and Class V restorations.
* Small Class I fillings.
* Wedge-shaped defects.
* Core build-ups.

### PULPDENT - 113717 GlassFill Ionom Cem KIT Pwd & Liq

**US$ 88.50**

PULPDENT - GlassFill Glass Ionomer Cements Type II - GlassFill Kit: 30g powder, 15mL liquid, mixing pad, scoop # IFU

**GlassFill Kit**

Ionomer Restorative Type 2

# 113717 - Mfg # IFU

**Features:**

- Self-Cure
- Fluoride Releasing
- Radiopaque

GlassFill is excellent for restoring cervical erosion areas, root caries and Class III & V cavities. It is also indicated for fissure filling and restoring deciduous teeth. Its index of refraction matches that of tooth structure, which prevents the shine-through or matte-white effect.

- For restoring cervical erosions, root caries and Class III and V cavities.
- For fissure sealing and restoring deciduous teeth.
- Use alone or with composite overlay and as a liner in the sandwich technique.
- Universal tooth shade. High compressive strength.
- Fast setting. Acid etchable.

All Pulpdent Glass Ionomer Cements Offer These Outstanding Benefits:

- Fluoride ion release
- Low coefficient of thermal expansion: 9 ppm
- Excellent bond strength to dentin and enamel
- Acid-etchable
- Very high compressive and diametric tensile strengths
- Controlled setting to prevent rapid dehydration which has been shown to cause pulpal sensitivity

Contains: GlassFill Kit: 30g powder, 15mL liquid, mixing pad, scoop

### ESPE - 400640 KetacFil Plus Aplicap A1

**US$ 124.43**

ESPE - KetacFil Plus Aplicap A1 Refill Pack - #55020 Glass Ionomer Restorative

**ESPE - KetacFil Plus Aplicap A1**

Ionomer Luting Cements Type 1

# 400640 - Mfg # 55020

**Features:**

- High fluoride release
- Radiopaque
- Self-cure
- One-step placement

Shade: A1 Refill
ESPE - 400641 KetacFil Plus Aplicap A3  US$ 124.43
ESPE- KetacFil Plus Aplicap A3 Refill pack - #55040 Glass Ionomer Filling
Ionomer Luting Cements Type 2
# 400641 - Mfg # 55040
Features:
* High fluoride release
* Radiopaque
* Self-cure
* One-step placement
Shade: A3 Refill

PRIME-DENT 000 - 000-185 PRIME-DENT LC Glass Ion Kit A2  US$ 18.00
PRIME-DENT Glass Ionomer Kit Light-Cured A2 6.8ml
Ionomer Restorative Type 2
# 000-185 - Mfg # 000185
Advantages:
Smaller particles
Excellent aesthetics and polishability
Higher filler loading
Significantly improved abrasion resistance
Good radiopacity
Facilitating post-operative diagnosis
Self-adhesive to tooth structure
No etching, no bonding
Hydrophilic
Very good results in areas where rubber dam is difficult to use, cavity margins are in dentin and enamel prisms can not be properly etched
Smooth, porosity-free surface after sealing
Practical application and manipulation
Excellent aesthetics
Contains: A2 6.8ml

RIVA IONOMER TYPE II LIGHT CURE - SDI
RIVA IONOMER TYPE II LIGHT CURE - SDI
Features:
Riva Self-Cure is a self-curing conventional glass ionomer restorative material.
Ideal for minimally invasive dentistry
Riva Self Cure is the ideal restorative material for use in minimally invasive dentistry (MID) as it is a bioactive material which prevents caries from occurring. Natural tooth structure is preserved, so large caries and undercuts are not necessary.
Great marginal adaptation
Riva Self Cure is the answer to long term microleakage prevention. Use it as a restorative or a base under permanent restorations. Self-cured glass ionomer bases were more effective in reducing microleakage in both the occlusal and proximal cavo surfaces than a flowable resin. 71
Indications
* Non stress bearing Class I and II restorations

### Features:

* Combination of GIC advantages and composite advantages:
Riva Light Cure is a light-cured, resin-reinforced glass ionomer restorative cement. Glass ionomers release fluoride and chemically bond to the tooth structure whilst...
Composites have excellent aesthetics. Riva Light Cure is a combination of both with excellent aesthetics, fluoride release and chemically bonds to the tooth structure.

* Great marginal adaptation:
Riva Light Cure is the answer to long term microleakage prevention. Use it as a restorative or a base under permanent restorations. “...light-cured and self-cured glass ionomer bases were more effective in reducing microleakage in both the occlusal and proximal cavo surfaces than a flowable resin.”

* Exceptional handling:
Riva Light Cure HV can be manipulated immediately after mixing. It is a very sculptable material. It does not stick to instruments and resists any initial threading traditionally found with a light cured GIC. Riva Light Cure HV does not lift off after placement, particularly in the maxillary position.

# 123940 - Mfg #1111-0001

- Features:
The number one solution for fast bonding of brackets made of metal and ceramic

- Advantages:
  - Light curing
  - Highly transparent
  - Stable, convenient consistency

- Application:
  - Clean enamel surface
  - Isolate with cotton rolls
  - Etch enamel surfaces with phosphoric acid
  - Rinse and dry
  - Apply Megasel Orthodontic
  - Position the bracket on the tooth surface
  - Light cure

- Kit includes:
  - 1 syringe 3gr

**US$ 31.29**

PROLINE - 011-027 One-Step DC Ortho Bonding kit

PROLINE - One Step Orthodontic Adhesive System

Orthodontic Cements
# 011-027 - Mfg # 011-027

Features:
A unique composite resin system for bonding plastic, metal or porcelain orthodontic brackets to etched enamel.
The highly filled paste features a tacky viscosity that flows well and eliminates bracket flotation.

Benefits and Features:
* Maximum strength within five minutes
* Bonds all types of Brackets
* Paste available in economical syringes

Includes:
* 2 x 5g Paste Syringes
* 1 x 7ml Primer
* 1 x 7ml Etchant Liquid
* 1 x Instructions
* The Catalyst Resin/Paste system sets on contact, giving the clinician complete control. The primer also helps to seal the etched enamel.
* The cohesive strength of the adhesive is stronger than the bond to the tooth. Allowing for one-piece removal after orthodontic treatment.

US$ 31.29

PULPDENT - 039-IV Ortho-Choice Glass Ion Varnish 30ml

PULPDENT - Ortho-Choice Glass Ionomer Varnish 30ml # IV

US$ 20.72

PULPDENT - 113716 Ortho-Choice Glass Ionomer Kit

PULPDENT - Ortho-Choice Glass Ionomer Band Cement Kit: 30 gm powder, 15 ml liquid, mixing pad and scoop #OCGI # OCGI

Orthodontic Cements
# 113716 - Mfg # OCGI

Features:
Fluoride Releasing - Self-Cure; Ortho-Choice

All Pulpdent Glass Ionomer Cements Offer These Outstanding Benefits:
* Fluoride ion release
* Low coefficient of thermal expansion: 9 ppm

US$ 88.50
* Excellent bond strength to dentin and enamel
  * Acid-etchable
  * Very high compressive and diametric tensile strengths
  * Controlled setting to prevent rapid dehydration which has been shown to cause pulpal sensitivity

Contains: Glass Ionomer Band Cement Kit: 30g powder, 15mL liquid, mixing pad and scoop

---

**PULPDENT - 039-OCNM Ortho-Choice No-Mix SF Adhes Kit**

US$ 135.28

**PRIME DENT - 116021 PRIMEDENT VLC Ortho Bondi Kit**

PRIME DENT VLC Light Cured Orthodontic Orthodontic Cements
# 116021 - Mfg # 012-024

Features:
A unique Light Cure Composite resin system for bonding plastic, metal or porcelain orthodontic brackets to etched enamel.
The highly filled paste features a tacky viscosity that flows well and eliminates bracket flotation.

Includes:
* 2 x 5g Paste Syringes
* 1 x 7ml Primer
* 1 x 7ml Etchant Liquid
* 1 x Instructions

Physical Properties
* Light Cure Time: 30 Seconds
* Compressing Strength: 300MPa
* Flexural Strength : 140MPa
* Shear Bond Strength: 21MPa
The Catalyst Resin/Paste system sets on contact, giving the clinician complete control. The primer also helps to seal the etched enamel.
The cohesive strength of the adhesive is stronger than the bond to the tooth. Allowing for one-piece removal after orthodontic treatment.

US$ 22.03
PROLINE - 012-024 Pro-Line VLC Ortho Bonding Kit

US$ 33.05

Features:
A unique Light Cure Composite resin system for bonding plastic, metal or porcelain orthodontic brackets to etched enamel.
The highly filled paste features a tacky viscosity that flows well and eliminates bracket flotation.

Includes:

* 1 x 7ml Primer
* 1 x 7ml Etchant Liquid
* 1 x Instructions

Physical Properties:
* Light Cure Time: 30 Seconds
* Compressing Strength: 300MPa
* Flexural Strength: 140MPa
* Shear Bond Strength: 21MPa

* The Catalyst Resin/Paste system sets on contact, giving the clinician complete control. The primer also helps to seal the etched enamel.
* The cohesive strength of the adhesive is stronger than the bond to the tooth. Allowing for one-piece removal after orthodontic treatment.

PROLINE - 012-031 Proline Ortho Cem Syr Only ea

US$ 18.00

Features:
a dual cure composite resin cement ideally suited for cementing metal molar bands. Chemically bands to both tooth structure and metal band to create compressive strength reducing washout and loose bands. The cement ideally mixed and has no strong odor or aftertaste. The adhesive can be light cured immediately set band in place. Without light activation a complete set is achieved in five minutes. Contains fluoride for added tooth protection. Easily dispensed from economical screw syringes or in smart auto-mix system.

1 Syringe 5gr
**PHROSPHATE CEMENTS KITS - PROLINE**

**Features:**
A very high strength permanent cement (131 MPa Compressive Strength) representing perhaps the oldest and most well accustomed cement still in use. It also provides a good insulating layer against thermal shock.

**HY-BOND ZINC PHOSPHATE CEMENT - SHOFU**

Combines tannin fluoride with high compressive strength to produce an innovative material. Excellent for seating permanent prostheses. A superior zinc phosphate cement containing tannin fluoride and offering high compressive strength.

**Specifications:**
- Seals dentinal tubules and minimizes post-operative sensitivity
- Excellent for seating permanent prostheses
- Film thickness (25m)
- High compressive strength (98 MPa)
- High level of radiopacity
- Apply directly to prepared dentin
- Neutralizes the harshness of phosphoric acid

US DENTAL DEPOT Inc is an Authorized SHOFU Dealer in the US.

ZINC PHOSPHATE CEMENT - FLECK’S

Features:
Fleck’s Zinc Phosphate Cement is a superior cement that is not matched anywhere on the market. Since the advent of zinc phosphate cement, many other types of cement have been introduced. None, however, has demonstrated clinical superior in terms of strength, resistance to dissolution, and overall retention like Fleck’s Zinc Phosphate Cement has. And of all zinc phosphate, Fleck’s is the leading brand and cement of choice of dentists.

Available colors: Snow White, Light Yellow, Yellow, Golden Yellow, Light Gray, Golden Brown, Ceramic Blend.

ESPE - Durelon Powder 3x20gm, Jars #38236 #
E760-38236 - # E76038236 ESPE - Durelon Triple Powder Cement 3x20gm
Polycarb Cement #400069 Mfg #38236

An exceptionally biocompatible luting cement

Durelon has demonstrated consistent performance without irritating pulpal tissue. A relatively neutral pH value reduces postcementation sensitivity, making Durelon ideal for patients with sensitive teeth.

Features and benefits:
* Low film thickness (11 microns) for precise fitting restorations
* Low solubility versus zinc phosphate or ZOE
Polycarb Cements

An exceptionally biocompatible luting cement

Durelon has demonstrated consistent performance without irritating pulpal tissue. A relatively neutral pH value reduces postcementation sensitivity, making Durelon ideal for patients with sensitive teeth.

Features and benefits:
* Low film thickness (11 microns) for precise fitting restorations
* Low solubility versus zinc phosphate or ZOE cements provides better marginal integrity
* Fluoride-releasing
* Simple technique requires no conditioning and no bonding agents for reduced chair time
* Low coefficient of thermal expansion helps reduce the risk of marginal gaps
* Easy to handle and place
* Durelon Fast Set Powder sets twice as fast as regular Durelon
* Radiopaque for easy detection

Chemical composition
Liquid: diluted polyacrylic acid

PULPDENT - 039-CPC WaterSet Polycarb Cement Kit

PULPDENT - PolyCarb WaterSet Cement Kit Polycarb Waterset Water Activated Polycarboxylate Cement -- # cpcPULPDENT - PolyCarb WaterSet - Cement Kit Polycarb Cements # 039-CPC - Mfg # CPC

Features:
Anhydrous Polycarboxylate Cement. Kind to the Pulp

This non-irritating, water activated polycarboxylate cement has the polyacrylic acid component incorporated into the powder. Just add water and mix

Recommended for temporary and permanent cementation of crowns, bridges and inlays. Restorations hold securely but can be removed, if necessary. A thick mix does not flow down under tissue but instead rolls over the sulcus, providing easy removal of excess.

Contains: 60 gm powder, dropper bottle, mixing pad, scoop.

Gc-Fuji - Coe-Pak Hard & Fast - (Mfr#135301) Periodontal Dressing in tubes -
Hard & Fast Set: ready for use within 1 min.- setting time 10 min. Two component material for wound dressing- to cover stitches or to stabilize loose teeth. [P# C 55-01-04 ]

GC - COE-PAK Noneugenol Surgical Dressing & Periodontal Pack - Hard & Fast
#108-135301 - Mfr #135301

Surgical Dressing & Periodontal Standard Pack

* Noneugenol Surgical Dressing and Periodontal Pack
* Formulated to protect surgical sites noneugenol surgical dressing and periodontal pack that has no burning sensation, no unpleasant taste, no disagreeable odor.
* It promotes cleanliness and healing.
* Plastic and cohesive; ropes of any length or thickness can be formed.
* Smooth texture allows COE-PAK to adapt closely to teeth and tissue to protect the wound.
**Cements and Liners**

**Surgical Cements**

* Sets with resilient, non-brittle hardness.
* Hard & Fast Set: ready for use within 1 min., setting time 10 min.

Set/Cure: Hard & fast set
Package: 90 gram Tube each Base and Catalyst

GC-Fuji Coe-Pak Periodontal Dressing in tubes - Regular Set: ready for use within 3 min.- setting time 30 min.- Two component material for wound dressing- to cover stitches or to stabilize loose teeth [ 205-9194 ]

COE-PAK Surgical Dressing & Periodontal Pack - Regular
#026-135001 - Mfr #135001

COE-PAK periodontal dressing is a noneugenol surgical dressing and periodontal pack that has no burning sensation, no unpleasant taste, no disagreeable order, and offers proven protection to surgical sites

Advantages
* Easily mouldable
* Elastic consistency
* Patient friendly
* Supports process of healing
* Eugenol free
* Compatible with resins

Set/Cure: Regular
Package: 90 gram Tube each Base and Catalyst

---

**Cements and Liners**

**Temporary Cements**

**NON EUGENOL TEMPORARY CEMENT - PRO-LINE**

Cementation of crowns, bridges and splints. Retention of temporary crowns, sealing dressing in teeth during root canal therapy procedures.
Trial cementation of permanent restorations prior to final insertion. Testing of interproximal contact prior to final placement.
Advantages:
* Different outlets prevent cross contamination
* Efficient mixing reduces waste
* Radiopaque
* Non-Eugenol for use in cases where a Eugenol temporary cement is not recommended
* Protects the gingival tissue
* Salivan resistant
* Excellent handling properties
* Severely resists the forces of mastication to enhance patients comfort
* Insoluble in mouth fluids and retains a tight marginal seal to prevent seepage of these fluids under the restorations. The cement will withstand functional stresses and permit ease of removal.
* In addition it has sufficient flow to facilitate complete seating of the restorations. The product is intended for use less than 30 days

**HY-BOND POLYCARBOXYLATE TEMPORARY CEMENTS - SHOFU**

HY-BOND POLYCARBOXYLATE TEMPORARY CEMENTS - SHOFU

A unique temporary polycarboxylate formula that 100% of independent evaluators rated Excellent or Good.
Special For Metacrylate Provisionals.
79% of independent evaluators said they would switch, "Its easier to clean-up and easier to remove".
Excellent for temporary crowns, bridgework, implant prostheses, long-term provisional and temporary cementation of permanent restorations.

Specifications:
* Eugenol-free
* Helps prevent microleakage and improves the marginal seal
* Excellent bonding strength for provisional restorations
* Fluoride additive for protection of tooth structure and reduction of post-operative sensitivity
* Economically priced compared to other leading brands
* Results from a recent study by an internationally respected, independent research institute.

* Made in Holland

POWERTEMP - J MORITA

Features:
PowerTemp is a user-friendly, auto-mix temporary cement. It is indicated for the temporary cementation of crowns and bridges, as well as try-in and evaluation of permanent restorations. PowerTemp demonstrates a powerful bond to crown and bridge materials and yet remains easy to remove. PowerTemp's non-eugenol and ZnO/Organic based formula will not inhibit the curing of resin-based materials and is an excellent choice when allergies to eugenol are a concern.

10 mixing tips

Cements and Liners

Temporary Filling Material

ESPE - 113695 CAVIT-G 28 gr Jar

Features:
A self-cured temporary sealing compound for the temporary restoration of cavities.

Applications:
Cavit G: Completely removable without burs: Inlay preparation.

Benefits:
Proven filling material for temporary fillings.
Simple to apply with filling instrument.
Quick and void-free curing in a moist environment.
Slight expansion of the filling material ensures a well-sealed margin

US$ 18.00

COLTENE - 123941 COLTOSOL F SGL 38g

Features:
Coltosol F is a temporary, eugenol-free filling material. The ease of use and the self-curing under the action of saliva make Coltosol F an ideal filling material for temporary fillings and temporary root canal sealings.
Available in shade Universal White.
* Fluoride-releasing X-ray opaque
* Easy adaption and adhesion in the cavity
* No mixing, easy to remove
* Self-curing under the action of saliva

US$ 14.00

Temporary Filling Material

META- 107679 Hydrof.Tempor.Filling Mat.40gr
META - MD-Temp White 40gr
Temporary Filling Material
# 107679

Hydraulic Temporary Restorative Material

Features
* Easy application and removal
* Hermetic seals the cavity
* Excellent stability when set
* Proper crush strength
* Shelf life: two years from the products date

Composition
* Polyvinyl Acetate, Zinc Oxide, Zinc Sulfate, Ethanol

Quantity: 40gr white past in jar

US$ 10.40

Cements and Liners
Venner Cements

FUSION-ZR VENEER CEMENT - TAUB

FUSION-Zr is self-adhesive, light cure veneer cement and is indicated for the adhesive cementation of all-ceramic restorations, Lithium Disilicate and CAD/CAM type materials, where light curing is desired.

SPEED-SET - Highly light sensitive, cures completely and fast.

FUSION-Zr can be used on all porcelain crowns.

Ultra grip placement gives FUSION-Zr a unique stay-put viscosity that holds veneers in place.

Easy peel-a-way cleanup.

3M - 312-3505 RelyX Unicem Aplicap A2 50pk

**Venner Cements**

Mfg # 56818

Features:
- Capsule A2
- Universal Shade Refill, 56818

Advantages:
- Time-saving - no etching, priming or bonding.
- Virtually no post-operative sensitivity.
- Easy removal of excess.
- Optimal consistency.
- Strong and moisture-tolerant.
- *Except for 2- or 3-unit Maryland bridges and 3-unit inlay/onlay bridges.
- Selective etching is required to increase surface area for bonding.

Specifications:
- \(<3\)-unit cementation of:
  - All-ceramic, composite or metal inlays, onlays, crowns and bridges.
- \(<3\)-unit Maryland bridges.

Cements and Liners

ZOE & Zinc Cements

ZINC OXIDE EUGENOL CEMENT KITS - PROLINE

* This cement has a sedative effect on the pulp and is especially useful for cementation on prepared teeth with exposed dentinal tubules.
* The addition of polymers as reinforcing agents have transformed it into a final cement and intermediate restorative material with a compressive strength of 5400 psi.
* Offers excellent adhesion and easy removal.

HY-BOND ZOE TEMP CEMENT - SHOFU

Features:
ZOE is a temporary filling/luting cement with a tannin fluoride additive.
* Tannin fluoride seals the dentinal tubules, reduces post-operative sensitivity
* Helps prevent the development of caries and the decalcification of dentin and enamel
* Excellent handling for cementing temporary crowns or filling materials
* High level of radiopacity
* Sets up promptly even in presence of moisture
* Easy to mix and clean-up

Combines tannin fluoride with high compressive strength to produce an innovative material Excellent for seating permanent prostheses.

US DENTAL DEPOT Inc is an Authorized SHOFU Dealer in the US.

DENSPLY - 116482 IRM - Intermed Restor Material

IRM - Intermediate Restorative Material - powder 38g and liquid 15ml - Zinc oxide-eugenol with polymer reinforcement. Temporary filling material. Dentsply Caulk (IRM - #610007)

Features:
RM-Intermediate Restorative Material is a polymer-reinforced zinc oxide-eugenol composition restorative material designed for intermediate restorations intended to remain in place for no longer than one year. It may also be used as a base under restorative materials and cements that do not contain resin components.

Composition:

Material Powder:
* Zinc Oxide
* Poly-Methyl Methacrylate (PMMA) powder
* Pigment

Material Liquid:
* Eugenol
