FLOW - 124482 Cable Saver for Sensor
FLOW - CABLE SAVER FOR SENSORS 8in Length - # 80500  [ x-ray ]FLOW
- Cable Saver for Sensors 8” Length
X-Ray Units & Systems
# 124482 - Mfg # 80500

Features:
Cable Saver protects your sensor cables from being stepped on, rolled over, twisted, and tangled. Easy to install and easy to keep clean, Cable Savers will add years to the life of your sensor cables. Available in 8 lengths. Simply cut to size!

Size: 8 lengths
Quantity: 1/Pkg

US$ 35.89

FLOW - 124481 Custom-Fit 2.0 Sensor Sleeves
FLOW - SNUGGIES 2.0 CUSTOM-FIT UNIVERSAL SLEEVES FOR LARGER SIZE SENSORS - # 80223  [ x-ray ]FLOW - SNUGGIES
2.0 CUSTOM-FIT UNIVERSAL SLEEVES FOR LARGER SIZE SENSORS
X-Ray Units & Systems
# 124481 - Mfg # 80223

Features:
Snuggies 2.0 can protect your equipment and your patients with a snug, custom-fit sensor sleeve regardless of sensor size. Simply peel, stick, and go! Snuggies works with sensors of any size, shape, and thickness. Patients will love Snuggies because there’s less loose plastic to gag on. Practitioners will love Snuggies because one-size-fits-all, eliminating the need to buy and stock sleeves of many sizes. Plus, with Snuggies, you don’t have to twist the sleeve around delicate sensor cords to keep the sensor from sliding around in the sleeve. To custom-fit your Snuggies, just peel off the clear tab, then pull the white tab snug against the sensor. That’s it!

Quantity: 500/Pkg

US$ 42.00
FLOW - 124352 Deluxe Cushies 300pk
FLOW - DELUXE CUSHIES 300/box - # 15810  [ x-ray ]FLOW - DELUXE CUSHIES 300/box
X-Ray Units & Systems
# 124352 - Mfg # 15810

Features:
Deluxe Cushies are soft and spongy adhesive tabs that soften the edge on sensors, PSP envelopes or film.
* Easy to use
* Works on either long or short side
* One size fits all
* Made in the USA

Quantity: 300 per box

US$ 31.18

FLOW - 124351 F Casette Panoramic corp 1pk
FLOW - FLEXIBLE PANORAMIC FILM CASSETTES FOR PANORAMIC CORP. MACHINES w/ tongue flap (5x12in) - # 11532  [ x-ray ]FLOW - Flexible Panoramic Film Cassettes for Panoramic Corp Machines w/ tongue flap
X-Ray Units & Systems
# 124351 - Mfg # 11532

Features:
Flow Dentals Flexible Panoramic Film Cassettes are the perfect accessory for use with our Panoramic film. Fabricated of sturdy, heavy gauge vinyl for decades of reliable use, this flexible cassette curves to any desired position.
The cassette is easy to load and closes by two snaps on the side. One side is labeled front so you are always assured of placing the correct side to the x-ray source.
The cassette can be used with either 5 x 12 or 6 x 12 film and of course any brand film. As with any x-ray film the cassette must be loaded using standard film precautions in a darkroom setting. See page 25 for Intensifying Screens.

Size: 5x12 in

INSTANT FILM PROCESSING CHEMISTRY
GALLONS - DENTX
Excel Film Processing Chemistry

Quality chemistry ensures clearer films and an efficiently running processor.

Dental offices have trusted Dent-Xs Excel Developer and Fixer for decades because it is the highest quality chemistry available.

* IFP Case Contains 4 One-Gallon Bottles
To rise above the rest, Excel!

Excel Chemistry Features:

- Superior Quality Ready-To-Use Chemistry for Film Processors
- Survey Rated as #1 Film Processing Developer and Fixer
- Environmentally Friendly, Non-Hazardous Chemistry
- Cleaner Working Film Processor
- Low Oxidation Rate Ensures a Longer Shelf Life
- Lower Replenishment Rate in the Processor
- Provides High Film Output
- Superb Chelating Agents for Highest Quality Films
- Ready-To-Use, Concentrate and Instant Film Processing Agents
- Bottling & Distribution Facilities in California and New York
- Each Case Contains 4 Gallons of Chemistry
- Quarterly Developer and Fixer Specials

### ECCO - 110652 Chairside Darkroom

US$ 134.40

ECCO - Chairside Darkroom - Completely Portable - Rite-Dent Dimensions:
12x12x12in Weight 8lb  [ dark room box developer reveladora cuarto oscuro ]

IDS - Chairside Darkroom
Developer
# 110652

Features:
Dark room box developer
X-Ray Units & Systems
Completely Portable rite-dent

Dimensions: 12x12x12 in

Weight: 8lb Depoty
DARBY - 113706 Concentrated Fixer & Developer

DARBY - Concentrated Processing Liquid - Ready to use 2 Liters bottles (to make 2 gallons total) each Fixator and Developer [Líquido revelador de Rayos X] Ecco - Ready to use Processing Liquid

Ready to use 1 Pint bottle each fix/Dev.
For manual processing.

Quala - 400835 Developer & Fixer Set 2 x 1gal

Quala - Developer & Fixer Set 2 1gal. Bottles of Each #270Q Quala - Developer & Fixer Set 2 1gal
Developers
# 400835 Mfg # 920-270Q

Features:
High Quality, Longer Shelf Life Non-HAZMAT Chemicals Convenient Pre-measured developer and fixer concentrates. Each bottle makes 5 gallons for rapid, accurate, no waste mixing.
Consistent results - Makes exactly the right amount of fresh chemical for the automatic processor replenishment bottles, where medium to high volume mixing is desired.
Makes 2.5 gallon, 5 gallon, or 10 gallons at a time.
Easy to Use-Pre-measured developer and fixer concentrates. Case contains two 5 gallon mixes With a complete mix it is equal to 10 gallons total.

* Contains: 2 concentrated 5 gallon mixes When Mixed = 10 Gallons total mixed

Air Tech - 400653 Developer & Fixer Set 2 x 1gal.

Air Techniques - Developer & Fixer Set 2 1gal. Bottles of Each - Air Techniques - #40270 Air Techniques - Developer & Fixer Set 2 1gal.
Bottles of Each
Developer
# 400653 - Mfg # 40270

Features:
Air Techniques developer and fixer are for use with all roller transport X-ray film processors.
* Developer has superior antioxidation properties for longer life
* Fixer easily washes off the film surface, extending the life of radiographs
* Balanced hardener levels protect emulsion, guarding against scratches and roller marks

Quantity: (2) 1 gal. Developer, (2) 1 gal. Fixer, 2 color coded sponges
Air Tech - 400655 PeriPro Developer & Fixer Set 3x1qt

Air Techniques - PeriPro Developer & Fixer Set 3 1qt. Bottles of Each - #90800

Developer
# 400655 - Mfg # 90800

Features:
Peri-Pro Developer & Fixer 3 Quarts 6/Ca Air Techniques. All models of Peri-Pro are designed to use Air Techniques Peri-Pro chemistry exclusively.
* Peri-Pro chemistry contains 3-one quart bottles each of developer and fixer.
* Developer and fixer last 2 weeks or 300-350 films.
* For rollerless type automatic film processing
* Every batch of chemistry receives continual quality inspection

Quantity: 1 qt. bottles of each

US$ 79.00

Air Tech - 400658 Spray 2000 Plus 1ltBottle

Air Techniques - Spray 2000 Plus 1ltr. Bottle - Air Techniques - #43965

Developer
# 400658 - Mfg # 43965

Features:
* Use Spray 2000 Plus for weekly cleaning of the A/T 2000 roller transports only
* Spray 2000 Plus Removes Build-up residue, protecting films from roller deposits

Quantity: 1 liter Spray 2000 Plus, 1 Spray Attachment, 4 Cleaning Webs

US$ 63.66

FLOW - 124366 Value Chem Devel & Fixer 1gal.

FLOW - DEVELOPER & FIXER: Manual Processing Concentrate (twin packs)
- # 24220 Twin-pak concentrate of Developer & Fixer (1 each). Each twin pak makes 1 U.S. gal. (3.8 liters). [ x-ray ]

FLOW DEVELOPER & FIXER:
Manual Processing Concentrate (twin packs)

X-Ray Units & Systems
# 124366 - Mfg # 24220

Features:
Flow Developer has a Phenidone base for a higher concentration of developer, yielding better radiographs and slower oxidation of the solution. Flow Fixer is designed to fix a film in three minutes. A bottle of concentrate makes one gallon of working solution.

Quantity: 1 each

US$ 28.00
SENSIBLE POSITIONING SYSTEM
- FLOW

Features:
New, improved Sensibles is a "universal" sensor positioning system that does it all. Our patent-pending ratcheting bite block locks down tight to form a custom-fit around any size sensor in either the Horizontal or Vertical position. After use, simply press the quick release button and autoclave your Sensible Bite Block.
Sensibles now feature a unique "floating" bite block. When taking a bite wing you simply slide the bite block to the approximate mid-line of your sensor! It’s quick, easy, and one bite block does it all!
Sensibles come in two sizes. Large is suited for most size 1 & 2 sensors in the vertical position. Medium is suited for most size 1 & 2 sensors in the horizontal position, and size 0 sensors in either the vertical or horizontal positions. Once you try them, you’ll quickly find yourself relying on just one size Sensible for the majority of your x-rays!

Color coded sizes. Quick and easy to use. Versatile and autoclavable. Economically priced too. What a Sensible way to take x-rays!

**RAPiD POSITIONER PSP & FILM - FLOW DENTAL**

FLOW DENTAL - RAPiD Positioner for Phosphor plate & Films

For accurate x-rays, nothing beats the RAPiD system! Our RAPiD is the original color-coded film positioner. RAPiD bite blocks feature rounded corners and are flexible for easy loading and unloading. And our tabs ensure your film or PSP plates won’t fall out during x-rays. Color-coding makes assembling the correct positioner quick and easy and RAPiD is autoclavable for over 100 uses. RAPiD is a right angle positioning device that assures correct film/cone alignment and prevents "cone cutting". It can be used for anterior, posterior, and bite-wing x-ray exams using any brand and size (3,2,1, and 0) of dental film.

The 810 Basic or 9000 processor may be used in a normally lighted room by employing the following optionally available Daylight Loader. This light-tight film loader accommodates all intraoral, panoramic, 5" X 7" (12.7 X 17.8 cm) and 8" X 10" (20.3 X 25.4 cm) film sizes.

**Water Recirculator Unit:**
This optional system is capable of providing wash water when it is impractical to connect the processor to permanent plumbing. It consists of a submersible pump with line cord, hose for connecting the pump to the processor and a seven gallon water container. The pump line cord plugs into the same connector as would the Solenoid Assembly.

**Mounting Base:**
The Mounting Base raises the Processor 4 1/2" (11.4 cm) above the countertop, providing clearance for all hoses and eliminating the necessity of drilling holes in the countertop.

**Processor Stand:**
The Processor Stand provides for convenient support of the Processor, Water Recirculator and storage. It is of molded construction and extremely rugged.

810 FILM PROCESSORS - DENTX

AUTOMATIC FILM PROCESSOR

Features:
There are over 65,000 Dent-X 810 automatic processors installed worldwide, spanning over 25 years of high quality film processing. Each of the three processor models share some of the same popular characteristics:

All Dent-X Automatic Film Processors:
* Are extremely low maintenance
* Alert the operator when the system is ready to process film
* Quickly and quietly produce a dry, archive-ready film
* Have a compact form, specifically designed for dental offices
* Can be cleaned and prepped in minutes
* Are available with an optional chemical drain kit to make cleaning even easier

The 810 Plus and 810 Plus AR Processors
* Are designed for high volume offices
* Activate automatically once the system is ready - place the film and walk away!
* Shut down automatically when finished - saving energy and chemicals
* An automatic chemical replenishment kit is included with the 810 Plus AR and optional on the 810 Plus

DV FILM - FLOW

**Features:**
Flow Dental DV-54 / DV-53 Pediatric Intraoral X-Ray Film, Vinyl, is a quality D Speed dental x-ray film packaged in soft, supple vinyl packets to protect film and enhance patient comfort during exams. Flow Silver D Film is formulated to deliver high contrast and high resolution images for diagnostic and clinical procedures. Each Flow Dental film packet contains films sandwiched between black paper and lead foil. The film is embossed with a dot and packets are color coded to indicate speed type and to ensure the correct side of the film is placed in the tube.

Pediatric Dental X-Ray Film is available in standard size 0 and is ideal for anterior, posterior, and bite-wing x-ray exams. DV-54/DV-53 D Speed X-Ray Film is similar to Kodak Ultra Speed film and may be processed manually or automatically. Intraoral Child X-Ray Film is available in two packaging options: single or double film packets. The Pedo Pak is available in cases of 5,000 films packaged in 50 boxes of 100. The Twin D Pedo Pak offers an additional film per packet for a second copy of each x-ray and is available in cases of 1,200 double film packs packaged in 12 boxes of 100. Flow Dental X-Ray Film is proudly made in the USA.

* D Speed - Child Size 0
* High contrast film produces excellent resolution and detail
* Available in packets of one or two films
* Two films per packet provide additional copy of each x-ray
* Soft, flexible vinyl exterior for patient comfort
* Ideal for anterior, posterior, and bite-wing exams
* Compare to Kodak Ultra-Speed
* Film can be processed manually or automatically
* Size 0 dimensions are 0.875 x 1.375 in (22 x 35 mm)
* Pedo Pak contains 100 films/box, 50 boxes/case (5,000 films)
* Pedo Twin Pak contains 100 double films/box, 12 boxes/case (1,200 packets w/ 2,400 films)
* Proudly made in the USA

**Quantity:** 100 per box

FV-FILM - FLOW

**Features:**
Flow Dental FV-58 Adult Single Intraoral X-Ray Film, Vinyl, is a quality F Speed dental x-ray film packaged in thin, flexible, and soft vinyl packets to protect film and enhance patient comfort during exams. Flow Xpress F Speed Film is specially designed to reduce radiation exposure while providing excellent image contrast and resolution and requires approximately half the exposure time of D Speed film.

Each Flow Dental film packet contains films sandwiched between black paper and lead foil. The film is embossed with a dot and packets are color coded to indicate speed type and to ensure the correct side of the film is placed in the tube. Adult Dental X-Ray Film is available in standard size 2 and is ideal for anterior, posterior, and bite-wing x-ray exams. FV-58 F Speed X-Ray Film is similar to Kodak Insight film and may be processed manually or automatically. Intraoral Adult
X-Ray Film is available in three packaging options: the Econo Pak (case of 7,200 films packaged in 12 boxes of 600), Fresh Pak (case of 5,000 films packaged in 50 boxes of 100), and Value Pak (case of 7,500 films packaged in 50 boxes of 150). Flow Dental X-Ray Film is proudly made in the USA.

- **F Speed - Adult Size 2**
- High speed film requires half the exposure time of D Speed
- Reduces patient radiation exposure while producing high quality images
- Single film per vinyl packet
- Soft, flexible vinyl exterior for patient comfort
- Ideal for anterior, posterior, and bite-wing exams
- Compare to Kodak Insight
- Film can be processed manually or automatically
- Size 2 dimensions are 1.25 x 1.625 in (31 x 41 mm)
- Econo Pak contains 150 films/sleeve, 4 sleeves/box, 12 boxes/case (total of 7,200 films)
- Fresh Pak contains 100 films/box, 50 boxes/case (total of 5,000 films)
- Value Pak contains 150 films/box, 50 boxes/case (total of 7,500 films)

X-Ray Units & Systems
Panoramic X-Ray

PANOURA 18S X-RAY EQUIPMENT
DENTEX Panoura 18S Digital Panoramic X-Ray - 3-in-1 system

The Panoura is a 3-in-1 panoramic system.
The Panoura 18 provides you with freedom and flexibility for in-office upgrade or 3D.
You can install the unit today and then upgrade to cephalometric module or with a 3D Sensor.

CMOS SENSOR
The Panoura 18S has a built-in cooling system located in the Sensor Housing.
The Panoura 18S also has multiple examinations:
* Panoramic 3D Imaging *

TMJ
Sinus and Cephalometric

Technical Information:
* Built-in Cooling system
* Multiple Examinations
* Autofocus Imaging
* Multifocal layer technology
* 4,500 images in a single pan
* CdTe technology: 3 times resolution
* Superior algorithm engine
For more specific technical information about PANOURA 18S system please read below.
The Panoura CMOS sensor can be easily placed on the Cephalometric arm or the panoramixc port. Just twist the lock in place and you are ready to acquire.

EVASOFT - DENTAL IMAGING SOFTWARE
EVAsoft Our dental imaging software supplied with the unit, is a powerful image management tool to acquire, process, print and store your images in a simple and effective way. Easy to learn and simple to
Operate, EVAsoft has all of the advanced features necessary to deliver rapid, effective diagnosis. From the simplicity of tab navigation to the outstanding value it offers, EVAsoft Dental Image Management software is the choice for any practice! EVAsoft interfaces easily with all popular dental imaging software suites.

**EVAsoft Features:**

- In-Office Training
- Lifetime Remote Support.
- 3D versions come with 3D reconstruction software.
- Tab Navigation
- Interfaces easily with all popular dental imaging software suites.
- Warranty: 2 Year Limited

**Panoramic X-Ray Ships**
in One Box: 92”L x 20”W x 48”H. 419 lbs. (200 kg)

### PANOURA 18S PANORAMIC DIGITAL

PANOURA 18S PANORAMIC DIGITAL Contains:

- Panoura,
- EVAsoft Imaging Software,
- In-Office Training,
- Lifetime Remote Support.

All Panouras may be upgraded to 3D at 2012 any time. 3D versions come with 3D reconstruction software.

**Warranty: 2 Year Limited**

X-Ray Units & Systems

Parts for X-Rays

**DIOX - 124510 DIOX Power Cord 2ft 110v**

DIOX - Power Cord Cable 2ft 110v [computer cable]

**PARTXRAY**

# 124510

Features:
* Replacement power cord for PC, monitor, printer, scanner, etc.
* Use to power a monitor, scanner or printer
* Replace an existing power cable or add extra distance between devices
* Available in lengths up to 8ft
* Connector 1: (1) NEMA 5-15 Male and Connector 2: (1) C13 IEC
* The female connector plugs directly into the device while the male connector plugs into a standard outlet.

Quantity: 1

US$ 18.00

X-Ray Units & Systems

Portable X-Rays

**PROX WIRELESS PORTABLE X-RAY UNIT - DIGIMED**

The PROX Wireless Portable X-ray is an advanced high frequency field dental x-ray Apparatus rated at 60kVDC and 2mA Tube Current which is designed to produce diagnostic quality x-ray for film and digital sensors

Features
* Optimized X-Ray Device With Digital Sensors
* Exposure time is adjustable by 0.01 sec. for more control
* Preprogrammed Buttons for fast anatomic selection with film or digital.
* More than 300 Times of consecutive use is available with high capacity rechargeable battery stable with P.M.C (Protection Circuit Module) application.
Remote control available with the world’s first infrared ray remote controller
* Since it is the only ultra slim X-Ray Device in the nation, even female users can handle without any inconvenience (H.V Unit Manufacturing is Patented)
* Optimized Grip with non-slip silicone grip and handle.
* Minimized Covering since most parts including X-Ray Tube, High Voltage generator, P.C.B and Cone (Radiation field limit device) are shielding with lead.
* Can be wall mounted with optional extensions

### DIOX WIRELESS PORTABLE X-RAY - DIGIMED

DIOX WIRELESS PORTABLE X-RAY - DIGIMED

The DIOX is more than easier to use as the light weight & compact size. The high efficiency tube and High Frequency Generator make sharp and clean image. Unique internal radiation shielding is especially designed to protect the operator and patients from radiation.

Special features and advantages of DIOX:
* 2mA tube current
* Automatic power interception
* Optimized X-Ray device with digital sensors
* High Frequency DC tube for less patient exposure and better image quality.
* Exposure time is adjustable by 001 sec. for more control.
* Preprogrammed buttons for fast anatomical selection with film or digital.
* More than 300 times of consecutive use is available with high capacity rechargeable battery stable with P.C.M (Protection Circuit Module) application.
* Remote control available with the worlds first infrared ray remote controller (Patent pending)
* Since it is the only ultra slim x-ray device in the nation, even female users can handle without any inconvenience
* Optimized grip with non-slip silicon grip and handle.
* Minimized covering since more parts including x-ray tube, high voltage generator, P.C.B and Cone (radiation field limit device) are shielded with lead.
* Can be wall mounted with optional extension arm

### MAXRAY - 123512 MAX-RAY Portable X-ray Black

**Features:**
- A lightweight, truly portable, FDA-approved alternative to traditional X-ray machines. Weighs only 4.4 lbs. Takes more than 300 X-ray shots on a single battery charge.
- MaxRay also uses oil-cooled tube technology (just like a traditional wall mount) for faster recovery and more frequent X-ray shots while extending the life of the tube.
- **1-year warranty.**
- **LIGHTWEIGHT:** Weighs only 4.4 pounds
- **SAFE** ZERO leakage design makes MaxRay safe.
- **RECHARGEABLE** One charge takes hundreds of x-rays.
- **ECONOMICAL** One MaxRay unit does the work of multiple x-rays systems. Improves your workflow in your office, its fast and convenient.
- **PRACTICAL** Handheld design allows operator to stay with the patient during procedures like taking a picture!
- **SIMPLE** No big bulky arms, backing plates for walls, special cabinets or costly electrical hookups.
- **VERSATILE** The MaxRay Portable Handheld Unit can go with you anywhere. From one office to another!

**Includes:**
- 1 MaxRay Handheld X-Ray,
- 2 Batteries
- 1 Battery Charger
- 1 Carrying Case

**Price:** US$ 3,950.00
MAXRAY - 123513 MAX-RAY Portable X-ray Wht

GENORAY - 123530 ZEN-PX2 Portable X-Ray

Features:
Very small doses of radiation keeps patients and dentists safe.
<table>
<thead>
<tr>
<th><strong>GENORAY - 102303 PORT-XIII Portable X-Ray</strong></th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Price</strong>: US$ 3,900.00</td>
</tr>
</tbody>
</table>

**Features:**
The Port-XIII generates and controls X-Ray to acquire teeth and jaw images.

**New Advantages:**
- Camera Type (Wireless)
- Graphic Lcd
- Collimator Tube
- The Port-XIII Compared with other existing portable X-ray, the PORT-X III contains high capacity of rechargeable battery
- Accordingly, voltage supply cable does not need to be used.
- High-definition LCD graphics show every conditions, photographing condition and action condition. As the result, PORT-X III is able to be used convenient.
- The best quality of image can be simply acquired.
* The Port-XIII Reduces 150% conventional radiation
* The Port-XIII - Includes rechargeable battery
* The Port-XIII can be used for adults or kids
* The Port-XIII can be used with digital sensor
* The Port-XIII Moves easily
* The Port-XIII Inverter system for High voltage occurrence makes X-ray generating power steady High capacity of rechargeable battery causes the possibility of using PORT-X III in external examination, ambulance and even field operation.

**Technical Specifications:**
* Type: High Frequency Inverter
* Power Output: 180 Watts
* Tube Voltage: 60kv
* Exposure Time Set: 56 Steps (0.01~2.0 Seconds) 22.2 VDC
* Number of Exams: 100 per full charge
* Main Body: 5.18lb (2.35kg)
* Warranty: 18 Months

**System Information:**
* The Port-XIII High capacity enables it wireless, which makes it to store and move very easily
* Battery type of x-ray system, get rid of all cables outside
* PORT-X III generates and controls X-ray in order to acquire images for tooth and jaw.
* The Port-XIII generates X-ray from high voltage electricity into the X-ray tube, which penetrates tooth and jaw and makes X-ray images on receptor. (Chemical film or Digital sensor)

### FLOW - 124353 Apron Uni-Hangar

**FLOW - 124353 Apron Uni-Hangar** - US$ 36.25

FLOW - Apron Uni-Hangar - # 16401 Uni-Hangar fits all types of Flow protective aprons. [x-ray]

**X-Ray Units & Systems**

FLOW - Apron Hanger

# 124353 - Mfg # 16401

**Features:**
Flow carries the UniHanger which allows you to hang your apron properly, on a hook or in a closet, to prevent folds which will damage the lead lining.

**Quantity:** 1
LEAD X-RAY PROTECTIVE APRONS - FLOW DENTAL

FLOW - LEAD X-RAY PROTECTIVE APRONS

Safe'n'Sure Protective Aprons

Flow's lead aprons provide traditional protection for your patients in a variety of styles. They're available in 7 fashionable colors to match your decor and create a relaxing environment for your patients and yourself. Considered the industry standard, Flow aprons are manufactured from lead rubber with an attractive vinyl front and a tear-resistant cling back. They clean easily with soap and water and withstand years of heavy use.

Made for years of heavy use, all lead aprons provide 0.3mm lead equivalent protection.

Aprons are available with and without attached thyroid collars, and thyroid collars can also be ordered separately. Select from any of the fabric colors shown below.

**NO-LEAD PROTECTIVE APRONS - FLOW DENTAL**

**FLOW - NO-LEAD X-RAY PROTECTIVE APRONS**

Our new aprons are made of environmentally-friendly, lead-free, non-toxic materials.

They're lighter and more flexible than conventional lead aprons, but have the same protective qualities! All Flow No-Lead Protective Aprons provide 0.25mm lead equivalency protection. Aprons are backed with a tear-resistant cling fabric.
Aprons are available with and without attached thyroid collars, and thyroid collars can also be ordered separately.

**Size: Adult - 24” x 26”**

# THYROID COLLAR LEAD-FREE - FLOW DENTAL

FLOW - THYROID COLLAR LEAD-FREE

Our lead-substitute material provides 0.25mm lead equivalency protection while making our aprons 25% lighter than traditional aprons. And No-Lead aprons don’t require special disposal.

They are better for you, better for your patients, and better for the environment! The safety of lead protection without the weight... or the lead!

**Size:** 5" x 27"

FLOW - 124480 Custom-Fit Sensor Sleeves Univ
FLOW - SNUGGIES CUSTOM-FIT UNIVERSAL SLEEVES FOR REGULAR SIZE SENSORS - # 80222  [ x-ray ]FLOW - SNUGGIES CUSTOM-FIT UNIVERSAL SLEEVES FOR REGULAR SIZE SENSORS
X-Ray Units & Systems
# 124480 - Mfg # 80222

Features:
Snuggies can protect your equipment and your patients with a snug, custom-fit sensor sleeve regardless of sensor size. Simply peel, stick, and go! Snuggies works with sensors of any size, shape, and thickness. Patients will love Snuggies because there is less loose plastic to gag on. Practitioners will love Snuggies because one-size-fits-all, eliminating the need to buy and stock sleeves of many sizes. Plus, with Snuggies, you don't have to twist the sleeve around delicate sensor cords to keep the sensor from sliding around in the sleeve. To custom-fit your Snuggies, just peel off the clear tab, then pull the white tab snug against the sensor. That's it!

DENTX- 114276 Endos ACP Remote PushButton

DENTX- Endos AC/ACP Remote Push-Button Kit  #9992700604  #999-2700-604
#NAME?DENTEX- Endos AC/ACP Remote Push-Button Kit

The sophisticated Endos ACP timer allows the selection of optimum exposure parameters using pre-programmed anatomical techniques.

The choice of the diagnostic target is easily achieved in two quick steps: Choose the size of the patient from the three available and choose the dentition area to be examined. Thats all.

At the touch of a key a specific modality may be chosen which optimizes exposure times for use with any digital acquisition system.

Endos AC: The Essential Unit: While employing the same advanced technology of the Endos ACP, Endos AC is based on the classic manual selection of exposure times.

X-Ray Units & Systems
X-Ray Sensor

SOREDEX - 102302 DIGORA Optime Intraoral System  US$ 14,175.00
SOREDEX - Digora Optime Intraoral Imaging System
X-Ray Sensor
# 102302 - Mfg # J708469

Features:
Superior image quality
Clinical image quality is a result of the whole Digora Optime concept. The Digora Optime System uses highly sensitive and intelligent Imaging Plate readout technology to achieve high quality images with an exceptionally wide dynamic range. The result is that even small details like 0.06mm root canal files are visible.

In digital imaging, an optimal signal-to-noise ratio is important to create images of the highest quality, too much noise results in a loss of diagnostic information. The Digora Optime System is designed with a short light path from the imaging plate to the photomultiplier, which means that a low dose can be used while keeping the noise level low.

Efficient Workflow:
The Digora Optime imaging procedure has been designed to be as simple and easy as possible so that workflow in your dental office is more efficient. The Digora Optime imaging procedure is fast
* Imaging plates are as easy to position in the patient's mouth as film
* The readout process is completely automatic
* The readout time is very short
* No additional adapters nor equipment are needed
* Compact Design
* Smart Design
* Quick Readout Time
* Full Daylight Use

DIGORA SENSOR PLATE - SOREDEX
DIGORA OPTIME SENSOR PLATE - SOREDEX

Thin and reusable Imaging Plates are as easy to place and position as conventional film. Imaging Plates can be placed accurately both horizontally and vertically - you can take exact intraoral projection. By using Imaging Plates you can reduce the number of retakes.

OpTime Imaging Plates are comfortable for the patient and easy to handle for the user.

Marker
The new OpTime Imaging Plates include a marker that is visible on the image if the Imaging Plate is exposed from the back side.

Hygiene Bags
New two-colored hygiene bags make positioning simple and eliminate the possibility of cross contamination. Sealing and opening the hygiene bags is effortless.

Imaging Plate Covers
The covers protect the Imaging Plates and therefore extend their usable life considerably. The covers protect the Imaging Plates from cross-contamination and light after the hygiene bag is removed.
**DIGORA X-RAY SENSOR - SORED EX**

**DIGORA X-RAY SENSORS.**

DIGORA Toto sensors employ the latest CMOS technology and offer several benefits over traditional intraoral sensors.

The very small pixel size and high signal-to-noise ratio enable the sensors to show even the smallest clinical details sharply and clearly.

**FEATURES & BENEFITS:**
* Easy to use and always ready
* Easy to handle and position.
* Image instantly available on screen
* Cutting edge CMOS technology
* Slimline design with all corners and edges rounded for patient comfort
* Reliable product and a safe investment

**DIGIMED- 115696 DVS-100 Intraoral Sensor 1.5**

**DIGIMED - DVS-100 Intraoral Digital Sensor**
X-Ray Sensor
# 115696 - Mfg # DVS-100

**Features:**
The DVS-100 Intraoral Digital X-ray Sensor feature the advanced Hybrid CMOS Technology (Onchip Trigger, Switching, Redundancy Signal)

**Advantages:**
- Advanced CMOS Technology makes excellent image Quality
- Ergonomic Design based on human intraoral shape for patient convenience
- Direct Digital x-ray imaging system designed specifically for dental radiography in oral cavity
- The system captures X-ray images and makes them available for display on the PC Screen
- The DVS-100 Sensor works with Windows XP operating System
- Easy to Use system.
- Low-dose performance

The DVS-100 Superior Image Quality of the is based on the CMOS APS (Active Pixel Sensor) technology. It provides consistently higher resolution and clearer images for accurate diagnosis & treatment planning.

Ergonomic DVS-100 Sensor is slim and designed to ensure complete patient comfort and easy positioning, these ergonomic features of the sensor offer exceptional patient satisfaction upon image acquisition.

**Technical Specifications:**
- Detector Structure: Low Nosise Hybrid CMOS
- Dimension (W X L X T): 1.14 X 1.52 X 0.19 inch (29.2 X 38.7 X 4.9mm)
- Pixel Pitch: 0.035mm

**Code** | **Name** | **Price**

101753 | DIGORA TOTO Sensor - Size #2 - 44 x 31mm (1.7in x 1.22in) - Original Soredex. ... | US$ 7,873.95
* Active Pitch Array: 686 X 944 Pixels (24.01 X 33.04mm)
  * Dynamic Range: 4096
  * Signal to Noise Ratio >37dB
  * USB Cable length between Controller and PC : 3m

EVA DIGITAL X-RAY SYSTEMS - DENTX

Backed by the proven reliability of tens of thousands of installations, EVA provides more than just great value. This classically styled, rugged sensor is just a few millimeters thin, but delivers crisp, clear radiographs using virtually any intraoral X-ray unit. EVA’s value makes it an ideal choice for any practice - from large installations to even the most value-conscious practices. No other sensor delivers EVA’s combination of superior image quality, ease of use and warranty assurance.

* Durable CMOS technology provides superior images using only a fraction of the power required by other digital sensor technologies
* Impact resistant housings are designed to minimize damage from a biting patient
* Sensor size #1 and #2 are similar to traditional films
* Hot swapping sensors between multiple computers offers greater speed, convenience and value
* Service multiple operatories with one sensor using the EVA docking station
* Small, inexpensive docking stations fit in the palm of your hand and make expansion easy
* 2-Year warranty for peace of mind

Made with pride in the USA

HANDY - 416695 HANDY HDR-500 Sensor #1

HANDY - HANDY HDR-500 Sensor #1  # HANDY HDR-500 - # HANDY HDR500
HANDY - HDR 500 Sensor #1
X-Ray Sensors

# 416695

Features:
* New APS CMOS Sensor . 400k times
* 27 LpMM (lines Per mm)
* Extreme X-ray Dose
* New Scintillator enhances x-ray conversion efficiency
* Multi User Software
* Powerful image management
* Dimension : 27.5mm . x 38.5mm (Standard X ray . 31 x 41mm envelope size)
* Active Area : 22.5 x .30mm (675mm2) . (Standard X ray . 29 x 38mm film size)
* Intrinsic Resolution theoretical 27 Lpmm - Practical 21 Lpmm
* Pixel size . 18.5 um
* Gray Value 4096 tones
* USB 2.0 Connection
* Cable length 2mts
* Warranty 1 year

A size-2 sensor is specifically designed for a bitewing or posterior periapical view.
But where the dental arch narrows in the anterior region, a size-2 or size-1 sensor may be too large.
So a narrower size 1 sensor is often needed to allow for proper geometry, to ease placement lingual to anteriors, and to properly break contacts.

Not all dental cases are the same. A size-2 sensor has the optimal imaging area for posterior teeth.
But the size of a patients mouth may vary. The patients arch form may be narrow.
TMD issues may limit a patients ability to open. Tori might limit positioning options. Or the patient may simply be a gagger.
In these cases, a size-2 sensor may simply be too large.

Therefore, a size-1 sensor is often needed both for children and adults for optimal patient comfort and proper imaging geometry.

Though some believe that a size-2 is suitable for all situations (perhaps due to experience with films flexibility), dental schools have long taught otherwise.
And experience shows that a size-1 sensor will result in better anterior radiographs, make a patients experience more comfortable, and is, in certain situations, the only way to get the most diagnostic radiographic view.
SCANX INTRAORAL PHOSPHOR PLATES - AIR TECHNIQUES

PSPs can comfortably accommodate children, adults, those with TMJ issues, large tori, gaggers and elderly patients. ScanX PSPs are wireless, flexible and 30 times thinner than direct wired sensors. The entire PSP surface area is active which means you capture nearly 40% more anatomy than the comparable sized wired sensor. ScanX PSPs do not require annual insurance. Operate in normal room lighting.

Available Size: #0- #2

TROPHY - 122950 TROPHY RVG First

TROPHY - RVG First Intraoral Digital Sensor - Size 1

X-Ray Sensors

# 122950

Features and Benefits

Balancing the perfect blend of sophistication and simplicity, the new RVG First sensor delivers powerful and reliable images at an affordable price point. And, thanks to its variety of imaging enhancements that empower accurate diagnoses, this intuitive sensor is the ideal solution for your basic intraoral imaging needs.

With the RVG First, intuitive intraoral imaging has never been so economical. Featuring a new simplified workflow to streamline the way you practice, the RVG First sensor is a reliable, simply sophisticated sensor that integrates with most imaging and dental practice management software.

* Affordable quality
* Built to last
* Improved workflow
* Enhanced patient comfort
* Comprehensive imaging software

SPANISH

* Conexion directa a USB de Laptop o Computadora
* No necesita interface
* No necesita instalar placas en su computador
* Software en espal
* Fil instalaci
* Soporte tecnico en Espal
**HIGHLIGHTS**
* Full Original Trophy Software
* Licensed for unlimited users
* JPG files
* Resolution : 14 lines
* Works with most Administration Softwares
* Multilanguage

**Technical Specifications:**
* All-purpose sensor providing the best compromise between ease of use and active area.
* Technology : SuperCMOS
* Grey levels: 4096
* Image Size 1200 * 900
* Active area: 22,2 x 29,6 mm
* Overall dimensions: 27,6 x 37,7 mm
* Sensor plate thickness: 7,3 mm
* Connection : USB 2.0

---

**TROPHY - 416669 TROPHY Scan Digital Radiography**  
US$ 6,500.00

**Features:**
* Real resolution of up to 17 lp/mm
* Covers the majority of intraoral indications, such as periapical, pediatric, and bitewing examinations.
* Design of reduced dimensions and silent exploration.
* Simple workflow, no need for "clicks".
* Thin and flexible plaques.

The everyday digital system that’s as easy as film
With its slim, compact design, the Trophy Scan is the perfect chairside system for routine intraoral exams and an easy, affordable digital solution for your practice. Through imaging plate technology, the Trophy Scan combines the best features of both digital and film—offering a familiar, film-like workflow that puts high-quality images in your hands almost instantly.

Uncompromised image quality
With three plate sizes available (0, 1, 2), the Trophy Scan covers all of your daily intraoral indications and, at 17 lp/mm, features a true image resolution well above many other systems. Combined with its new image processing and wide exposure range, the Trophy Scan delivers sharp, optimized contrast and low noise images.

The Trophy Scan also includes three scanning modes that allow you to prioritize either speed or resolution. You can even use preprogrammed anatomic filters to generate images with perfect contrast in a single click.

EVOLUTION - 400000 EVOLUTION X-ray Stand 110V US$ 2,895.00

The Bi-Image Evolution mobile delivers safe, powerful performance in a self-standing unit with the added versatility and freedom of medical grade caster wheels to be moved around. A single unit can satisfy the radiographic needs of multiple consultation rooms while helping reduce redundancy and clutter in the office. Sturdy, spring-tensioned arms measuring 7 inches in length ensure clear radiograph results the first time. The Evolution is made with discerning dentists in mind prioritizing quality, efficiency, and safety above all.

* Easily accessible controls on head unit
* Secure aluminum arm construction with easy to adjust spring tension
* Medical grade caster wheels
* Quick change option between 60 kVp and 70 kVp operating modes
* Compatible with both digital sensors and conventional film
* Includes 18 preprogrammed modes for quick setup - Includes wired and wireless remotes
* Includes optional dead man switch
* 7.87 inch beam limiter
Digital timer for manual exposure time selection
* 63 inch arm reach

Warranty: NO REPAIRS 24 HOURS HEAD REPLACEMENT "0" DOWN TIME
FASTEST AND MOST EFFECTIVE WARRANTY IN THE INDUSTRY

EVOLUTION X-ray Wall Mounted 110volts  Bi-Image EVOLUTION
X-Ray Wall Mounted 110v
XRay Unit
#400001

The Bi-Image Evolution wall mounted model delivers safe and powerful performance in a space saving package. Once fixed to the wall, the equipment can be folded away until the need to capture high resolution radiographs arises again. With an arm span of _ inches, the Evolution can adapt to almost any existing configuration in your consultation room. The sturdy, spring-tensioned arms ensure clear radiograph results the first time. The Evolution is made with discerning dentists in mind prioritizing quality, efficiency, and safety above all.

* Easily accessible controls on head unit
* Secure aluminum arm construction with easy to adjust spring tension
* Quick change option between 60 kVp and 70 kVp operating modes
